## Evaluation Results: Community Information Exchange Pilot

**26%**  
reduction

in mean number of **EMS trips** pre and post CIE enrollment for 233 CIE enrolled clients with a history of EMS use. Largest percent reduction (42%) for clients with highest EMS risk

**38%**  
reduction

in the percentage of housed clients who **exited housing** and went back to the street (24% vs 15%) between those that were not looked up compared to those that were looked up. Largest effect seen among clients with EMS history (62% reduction).

**44%**  
improvement

in percentage of housed clients who **remained in current housing placement** between those who were not looked-up and those who were looked up. Largest effect (77% improvement) seen among clients with EMS history.

## Lessons Learned

1. Planning phase requires significant amount of time and dedicated resources.
2. Bridging the gap between research based assessment tools and practical applications requires input and validation from multiple sources.
3. Data mapping and integration includes shared data fields across domains and requires structured data governance
