Bank like tomorrow depends on it.
Climate First Bancorp is a holding company committed to driving positive impact, fighting the climate crisis, and enabling customers to use their finances as a force for good.

Climate First Bank is the world's first FDIC-insured community bank founded to combat the climate crisis. We work hard to deploy our customers' deposits into projects that make a difference in the world, such as renewable energy, affordable housing, community development, and more.

OneEthos creates digital solutions for mission-driven financial institutions that expand markets, accelerate loan and deposit growth, and strengthen communities.

**Bank Like Tomorrow Depends On It.**

**Dear Reader,**

Every year, we face new challenges, and thankfully, once again, we can share the continued success story with our stakeholders.

In 2022, our first full year of operation for the Bank, we experienced the beginnings of what would be the sharpest rise in interest rates in over 30 years and navigated the divisive and ever-changing political atmosphere. While this velocity of rate hikes impacted loan demand for many banks, my team at Climate First Bank grew total assets by 127% and total deposits by 167% in 2022!

Along with this outstanding growth, we formed our holding company, Climate First Bancorp, and announced our fintech subsidiary, OneEthos. We launched a digital lending platform for consumer solar loans, which has grown to be supported by nearly all solar installers across Florida*.

Last but not least, we opened two new branch locations in the Central Florida market to better serve the consumers and small business customers in the Winter Park and Eustis/ Mt. Dora communities. This continued trajectory of strong and responsible growth will allow Climate First Bank to continue to execute on our mission of positive environmental and social impact in the communities we serve.

Our 2022 Impact Report shows not only our commitment to do right by our stakeholders but also the commitment and actions we have taken to become a leader in values-based banking.

Ken LaRoe, Esq., LEED AP
Founder, CEO & Chairman
Diversity Statement

Climate First Bank’s and OneEthos’s commitment to diversity aims to advance social equity, empower individuals to explore and appreciate their unique attributes and life experiences, challenge stereotypes, and nurture an inclusive and equitable environment. Climate First Bank and OneEthos value diversity and strive to create a community enhanced by the rich experiences and diverse perspectives of its members. Climate First Bank and OneEthos recognize the inherent value and dignity of each person and actively promote an awareness of, sensitivity to, and representation of diversity, including, but not limited to, differences of age, sex, gender, identity, race, ethnicity, national and regional origin, sexual orientation, religion and spirituality, disabilities, and socioeconomic status among staff, clients, and community members.

Land Acknowledgment

Climate First Bank and OneEthos humbly acknowledge and honor the indigenous communities whose ancestral homelands and resources were stolen and colonized in the creation of this nation and state. We recognize the Seminole, Tocobaga, Timucua, Miccosukee, and Mascogo Peoples as the past, present, and future caretakers of this land. We respect their sovereignty and their right to self-determination. We honor their sacred spiritual connection with the land and water.
Current Political Environment

Over the past year, partisan politics and culture crusades have informed, impacted, and shaped our business. Among the topics caught in the headlines were corporate governance, underrepresented communities, and the environment. Laws like the “Stop Woke Act” (FL House Bill 7), the “Don’t Say Gay Bill” (FL House Bill 1557), and the “Anti-ESG Bill” (FL House Bill 3), have endangered Floridians, our economy, and our environment. However, in 2022 we also saw the most significant climate legislation in U.S. history, the Inflation Reduction Act (IRA), passed. This historic law has created enormous opportunities for Climate First Bank and OneEthos to fulfill their mission and drive the renewable energy revolution. Our leadership teams have been outspoken on issues impacting our stakeholders, and we believe it is crucial to continue to do so.
Our Commitment Partners
The Partnership for Carbon Accounting Financials (PCAF) is a global collaboration of financial institutions that aims to develop a standardized approach for measuring and disclosing the greenhouse gas emissions associated with their lending and investment portfolios. PCAF provides tools and methodologies to help financial institutions understand their carbon footprint and set targets to reduce their emissions. By measuring and disclosing their carbon emissions, financial institutions can better understand and manage the risks associated with climate change and contribute to the transition to a low-carbon economy. PCAF currently has over 400 members, including banks, investors, and other financial institutions from around the world.

The Net-Zero Banking Alliance is a coalition of over 100 banks from around the world committed to aligning their lending and investment portfolios with net-zero greenhouse gas emissions by 2050 or sooner. Members of the Alliance work collaboratively to develop and implement strategies to reduce carbon emissions across all sectors, including energy, transportation, and agriculture. Through its collective efforts, the Net-Zero Banking Alliance aims to support the transition to a low-carbon economy and mitigate the risks associated with climate change.
B Corp Certification is awarded to for-profit companies that meet high standards of social and environmental performance, accountability, and transparency. The certification serves as a symbol of a company’s commitment to social and environmental responsibility and is held by thousands of companies worldwide, including notable companies like Patagonia and Ben & Jerry’s. Climate First Bancorp, Climate First Bank, and OneEthos will become fully B Corp Certified in summer 2023.

"We are grateful for the partnership with We Are Neutral, which has been a crucial contributor to Climate First Bank’s efforts to combat climate change since our inception. Their support has been instrumental in offsetting our operational footprint, as well as calculating our financed emissions, both of which are integral to our mission."

Lauren Dubé
VP | Director of Client and Mission Partnerships

*As data collection for the 2022 environmental impact assessment is concluding, the emissions total has been estimated using the difference in operational size between this year and last wherever incomplete data is being finalized.
In May of 2022, we launched our digital solar lending platform, built by our fintech affiliate, OneEthos. This revolutionary platform provides a simplified application process, expedited solar loan decisioning (usually within 30 seconds), 100% financing, and no dealer fees. Best of all, the platform has enabled us to fulfill our mission of expanding ethical solar finance.

2022 Highlights

- **25x** Growth of Our Solar Portfolio
- **100+** Onboarded Solar Installers
- **16,000+** kW of Solar Financed
- In 2023 we’re helping our clients leverage Inflation Reduction Act opportunities!

Dealer Fees

Deceptive solar energy loan financiers lure in clients by boasting of low interest-rate loans with exceptionally low payments, but there is a catch - undisclosed dealer fees can amount to more than 30% of the total cost of the system. For example, a $30,000 solar energy system could incur $9,000 or more in undisclosed fees. Dealer fees negatively impact the client, and the whole solar loan industry. Climate First Bank provides a transparent view of the costs an individual or business will face, and doesn’t charge dealer fees.

Established in 2018, Optimus Energy Solutions was founded with the mission to make renewable energy and EV charging accessible to individuals and businesses throughout Florida, Georgia, and the Southeast. Specializing in residential, commercial, and municipal solar PV and EV charging solutions, they emphasize long-term system operation and investor satisfaction over the warranty life of all systems.

“Climate First Bank has enabled Optimus to serve a much larger base of clients throughout Florida, truly investing in the communities we serve, and supporting partners with products and services that the marketplace desires. Optimus would not be where we are today without Climate First Bank’s creative loan offerings.”

Ben Pauluhn
President
Optimus Energy Solutions
optimusenergysolutions.com
$24.1MM of solar loans

16,762 kW of green, clean energy

Over the average lifetime of solar panels, these systems are estimated to prevent approximately 245,000 metric tons of carbon emissions from entering the atmosphere.

That is equivalent to:

54,520 gas-powered cars taken off the road

or

4 million trees planted
Legacy Vacation Resorts Solar Project

In 2022, Legacy Vacation Resorts, an Orlando-based hospitality company, began work to install solar on four of their Central Florida properties. The combined solar PV systems at their Clearwater, Kissimmee, Palm Coast, and Lake Buena Vista resort properties are estimated to produce over 2 million kWh of clean energy annually.

CENTRAL FLORIDA RESORT LOCATIONS

Clearwater | 19607 Gulf Blvd | 205 kW System
Kissimmee | 2800 Poinciana | 760 kW System
Palm Coast | 98 Palm Coast Resort | 402 kW System
Lake Buena Vista | 8401 Palm Pkwy | 147 kW System

“Investing in solar energy in partnership with Optimus Energy Solutions and Climate First Bank provides an extremely effective way to positively impact our environment and generate a financial return for the company.”

Alex Smith
Chief Operating Officer
Legacy Vacation Resorts, a Certified B Corp
Celebrating our former Director, Chris Castro, appointed by President Biden to the U.S. Department of Energy as the Chief of Staff for the Office of State and Community Energy Programs!
We offer the Mission Specialist Program to our team, which provides an opportunity to grow their knowledge in sustainability and social responsibility while earning yearly incentives. The program offers career education, exposure to environmental well-being, social justice, good governance, and opportunities to increase compensation.

“The Bank’s Mission Specialist Program was one of the biggest deciding factors for me to join the organization because it exemplified the Bank’s dedication to educating their employees”

Inspiring Conversations

Fireside Chat Series

Motivated by the Bank’s pledge to be a thought leader in the community, we host impactful leaders to speak on timely and important Corporate Social Responsibility (CSR) topics in an effort to educate our stakeholders and spark change in our community.

Our First Fireside Chat

In October of 2022, we kicked off our series with an inspirational conversation with Vincent Stanley, the Director of Philosophy at Patagonia. Having been with Patagonia since the beginning, Vincent Stanley provided unique insight into the future of Patagonia just weeks after Yvon Chouinard (the founder of Patagonia) announced his decision to give the company to the planet.

Lunch & Learns

To date, we’ve hosted 14 unique events covering topics including:
- LGBTQ+ Affirming Workplace
- Leadership in Energy and Environmental Design (LEED)
- Climate Resiliency
- Local Food Systems

Our 2023 Fireside Chat Lineup

Dave Chapman, Founder, The Real Organic Project

Carlton Ward Jr., Founder, The Florida Wildlife Corridor Foundation, Conservation Photographer, and National Geographic Explorer

Dr. Jane Goodall, DBE, Founder of the Jane Goodall Institute (JGI) and UN Messenger of Peace

Kat Taylor, Co-Founder and Board Chair of Beneficial State Bank, Board President of NextGen Policy, Founding Director of TomKat Ranch Educational Foundation, Founder of TomKat MeDiA, Founder of Growing the Table, Co-Founder of Radicle Impact

Dr. Mike Okun, Adelaide Lackner Professor and Chair of Neurology, Executive Director, Norman Fixel Institute for Neurological Diseases University of Florida Health
Driven by the goal of changing finance to finance change, Climate First Bank seeks to invest in organizations committed to bettering our communities and planet. In 2021, we identified and defined business sectors that make a positive impact on our communities and are pleased to share our 2022 progress in these categories. In 2023, we seek to expand our reporting categories to include underrepresented ownership, small businesses, as well as mission aligned practices, and good governance structures.

Impact Banking

In 2022, Climate First Bank launched two impact accounts designed to support causes aligned to our mission.

Key Features

- Climate First Bank donates $100 to an LGBTQ+ nonprofit partner for every qualifying* account opened.
- The account holder’s preferred name and pronouns used on their debit card and correspondence.
- No minimum account balance and no monthly fee.
- Our current LGBTQ+ nonprofit partner: Read More, Click Here

- Climate First Bank donates $100 to Project Regeneration for every qualifying* account opened.
- Free Project Regeneration-branded checks.
- Free autographed copy of Regeneration: Ending the Climate Crisis in One Generation.
- No minimum account balance and no monthly fee.

Read More, Click Here

*The $100 donation will be made following the establishment of a recurring direct deposit totaling $750 or more within 90 days of account opening.
Partner Story: IDEAS For Us

“Climate First Bank has been a longtime supporter of IDEAS For Us! In fact, Ken LaRoe, was one of the first donors to IDEAS For Us when we became a nonprofit in 2011! Fast forward to 2022 and Climate First Bank has expanded this partnership with supporting sponsorships, volunteer events, as well as sponsoring IDEAS for Us’s campus work at the University of Central Florida (UCF) for the Spring 2023 semester. This included providing the stipend for UCF’s branch leader, hosting a tree planting at the Arboretum, and numerous gatherings for students passionate about the environment to take local action.”

IDEAS For Us is a 501(c)(3) nonprofit organization, headquartered in Orlando, Florida and accredited by the United Nations. IDEAS For Us advances global sustainability in energy, water, food, waste, and ecology through local environmental action in over 30 countries around the world.

Clayton Ferrara
Biologist & CEO
IDEAS for Us
Going LEED!

Read about the steps we took to make our Winter Park branch as sustainable as possible. Stay tuned as we complete our branches in St. Petersburg and Mount Dora.

**ENERGY & ATMOSPHERE**
Optimized Energy Reduction

With a goal of achieving net-zero established from the outset – the project team integrated a systems-thinking approach to minimize energy consumption inside the Winter Park branch, while maximizing the amount of solar photovoltaics (PV) the building could accommodate.

Through these efforts the project achieved a 120% efficiency performance rating, meaning the Winter Park branch is designed to achieve net-zero, or even net-positive energy performance!

**MATERIALS & RESOURCES**
Building Product Disclosure and Optimization

Structural systems contribute up to 80% of a building’s embodied carbon. Adaptively re-using the building helps to reduce emissions related to the construction of this new Climate First Bank branch!

The materials utilized in this branch location were selected for their transparency, using Environmental Product Declarations and Healthy Product Declarations to ensure a transparent, environmental approach to building design.

**WATER EFFICIENCY**
Indoor Water Reduction

The plumbing fixtures in this branch location were designed to use over 45% less water than a comparable code-built interior space, protecting one of Florida’s most vital resources. This equates to an estimated 8,000 gallons of water saved per year!

**SUSTAINABLE SITES**
Electric Vehicle Charging Stations

Greenhouse gas (GHG) emissions from transportation account for about 27% of total U.S. GHG emissions, making it a significant contributor to climate change. Two Level 2 Electric Vehicle (EV) charging stations have been installed to encourage the use of EVs.

**Solar Photovoltaics**
A combined 26.1kW solar PV panel system on the roof and vertical façade. These offset the electricity consumption of the entire Bank branch. This however does not include the Electric Vehicle (EV) chargers located in the parking lot, which increase our total energy consumption but reduce emissions from vehicle emissions and related fossil fuel extraction/manufacturing!

**LEED** (Leadership in Energy and Environmental Design)

Credits relate to characteristics of buildings that address climate change, improve resilience, and support equitable communities. In LEED v4, of all LEED v4 credits, 35% relate to climate change, 20% directly impact human health, 15% impact water resources, 10% affect biodiversity, 10% relate to the green economy, and 5% impact community and natural resources.
Climate First Foundation, Inc. (formerly First Green Foundation, Inc.) was formed on August 9, 2009 and is a 501(c)(3) tax exempt organization dedicated to charitable and educational purposes, including fundraising, grant-making, and the operation and support of programs that impact the environmental, economic, and social well-being of the communities in which we serve.

Climate First Foundation was delighted to support the Heritage Harbor Playground Microforest in Bradenton, Florida. Developed by the Heritage Harbor Master Association and Suncoast Urban Reforesters, this native forest purifies air, water, harbor wildlife, and shelters the surrounding playground. Designed to be an experiential learning experience, the forest has trails, and interactive signs to encourage community members to learn about native plant species and their ecological importance.
OneEthos operates in the intersection of financial technology (fintech) and traditional banking with the objective to accelerate the delivery of sustainable and inclusive financial services to all segments of the population. We believe everyone should have access to banking products that enrich lives and sustain communities.

Big banks and fintech enterprises use modern technology infrastructure to better serve their customers. But these tech-enabled solutions are less accessible by community banks, credit unions, Community Development Financial Institutions (CDFIs), and "green" banks that collectively serve millions of customers in communities across the United States. We launched OneEthos to solve two problems: First, provide best-in-class digital solutions to financial institutions that are traditionally underserved by technology, and second, ensure those solutions generate positive environmental and social returns for companies, customers, and communities.

“We are proud of the success of our Solar Lending Platform, not only in driving demand to our client, Climate First Bank, but also in bringing down the cost of solar by 20% to 30% for their customers. Looking forward we are excited to make this product available to financial institutions across the country, fulfilling our mission to accelerate the delivery of sustainable and inclusive financial services to all segments of the population and helping financial institutions reach their environmental sustainability objectives.”

Marcio deOliveira
Founder & CEO
OneEthos
Empowering Conscious Capitalism

Ecountabl Technology

To accelerate its growth and mission, OneEthos acquired the groundbreaking climate fintech platform developed by Ecountabl Inc., an early-stage technology startup, in October 2022.

The award-winning platform tracks environmental and social data on more than 10,000 companies throughout the United States, enabling financial institutions to communicate and engage with their customers about the positive impact of their banking and spending.
