

POST TRAINING EXAMINATIONS

CLIA requires that: "prior to testing patients' specimens, all personnel have the appropriate education and experience, receive the appropriate training for the type and complexity of the services offered, and have demonstrated that they can perform all testing operations reliably to provide and report accurate results."

Our Post Training Exams provide analysts with the training documentation needed to demonstrate skills required by CLIA:

1. *"The skills required for proper specimen collection, including patient preparation, if applicable, labeling, handling, preservation or fixation, processing or preparation, transportation and storage of specimens."*
2. *"The skills required for implementing all standard laboratory procedures."*
3. *"The skills required for performing each test method and for proper instrument use."*
4. *"The skills required for performing preventive maintenance, troubleshooting, and calibration procedures related to each test performed."*
5. *"A working knowledge of reagent stability and storage."*
6. *"The skills required to implement the quality control policies and procedures of the laboratory."*
7. *"An awareness of the factors that influence test results."*
8. *"The skills required to assess and verify the validity of patient test results through the evaluation of quality control values before reporting patient test results."*

In order to document skills upon completion of training, Fertility Solutions offers Post Training Examination materials for each laboratory analyst, making it easy for your lab to complete this important CLIA requirement. Assayed materials are shipped either with the training materials or upon completion of training, and participants submit results online. Once results are received and graded, a training certificate is issued for each analyst.

FSI POST TRAINING EXAMINATIONS

Order one unit per analyst for each type of training to be examined.
Each analyst receives their own physical exam materials where applicable,
to remove the risk of a sample compromise by another analyst before analysis.

See descriptions below for the materials included with each exam.
Training certificates sent upon completion.

Item #	Product Name	Unit	Format	Description	List price
EX103	SPERM COUNT	EA	150 µL vials	Sperm Count - includes 2 vials of stabilized sperm for determining concentration	\$180
EX205	SPERM MORPHOLOGY	EA	Digital smears	Sperm Morphology - Includes 2 online digital morphology smears	\$180
EX107	SPERM VIABILITY	EA	Digital smears	Sperm Viability - Includes 2 online digital viability smears	\$180
EX111	POST VASECTOMY	EA	150 µL vials	Post Vasectomy – includes 2 vials of stabilized sperm for determining presence/absence	\$150
EX119	SPERM MOTILITY	EA	Online streaming videos	Sperm Motility – includes 2 online streaming motility videos	\$150
EX113	PPM COUNT/MOTILITY	EA	150 µL vials Online streaming videos	PPM – includes 3 vials of stabilized sperm and 2 online streaming videos for determining presence/absence	\$210
