Practice

Who We Are

ACA Studios is an established, medium-sized housing and mixed-use practice based in central London, specialising in solving complex development challenges by brokering collaborative solutions.

What We Do

We are firmly based in all stages of project development, from feasibility to post-completion.

We work with a varied client base including developers, housing associations, contractors, local authorities and local charities.

We have extensive experience in residential and mixed use projects, from single dwellings to large developments along with commercial, retail, community and education. We undertake masterplanning and the team has major projects experience.

How We Work

These days there are no “easy” projects: site constraints, funding, planning and public opinion challenges abound.

At ACA Studios we make projects happen: bringing together clients, statutory authorities, construction professionals and the local community we broker collaborative solutions which balance the needs of all parties.

Through consistent repeat business we build ongoing relationships with our clients, local and statutory authorities; these help us deliver optimum solutions via the shortest possible path.

What We Believe In

We make places for people. Our projects slot into and augment existing neighbourhoods and communities, providing new places for people to live, work and play. Our buildings are contemporary, innovative, reactive to their surroundings and built around the human. We like utility and only use materials which age and last.

Alan Camp
Director

Study

Canterbury School of Architecture [Part 1, 1974]
Canterbury School of Architecture [1st class Diploma, 1976]
Part III, Westminster School of Architecture, 1981

Qualifications

ARB (047649H), RIBA (4830503)

Joined Practice

1996

Biography

Alan Camp comes from a seafaring family near Gravesend, Kent; he decided at an early age to become an architect. He studied at King's School in Rochester, and went on to obtain a first class honours diploma in architecture at the Canterbury School of Art.

Following academic research into colonial modernism and traditional building of West Africa, Alan helped found and run the School of Architecture at the University of Ife, for three years. Upon returning to the UK in the early 1980's, he helped found Avery Associates with Brian Avery. In 1984, he joined with Francis Machin to form Machin Camp Architects; the company then became Alan Camp Architects in 1992.

Responsibilities and accountability :

- Strategic management of performance and design quality
- Site finding and sourcing development opportunities
- Networking, and introducing clients to potential JV and contractor Directors
- Feasibility and pre-acquisition design
- 'Value Engineering' existing consents at acquisition stage
- Planning policy negotiations including with the Planning Inspectorate
- Stakeholder lobbying and political consultation.

Biography

Alex trained at Brighton University, where he also completed a post graduate diploma in Interior Design in addition to his architectural qualifications. He is a registered architect and has been working for the practice for over two decades on projects ranging from single houses and restaurants, to £300m+ residential and regeneration schemes.

Alex has extensive managerial and practical experience of the residential sector and has been involved in the construction of several large mixed use schemes to date.

Responsibilities and accountability :

- Feasibility, appraisal services, pre-acquisition and concept design
- Fees, appointment, performance and Quality Management
- Project and Design Team Management
- Consultation and engagement with residents and local interest groups
- Performance Monitoring of external consultants
- Design reviews, Building for Life, HQI checks/assessments and Whole Life Costing
- Tender documentation, advice and negotiations
- Alex has achieved significant planning consents across Greater London and Kent
- Specialist housing, retirement housing, student accommodation and hotels
- Office-to-residential conversions
- Major mixed-use and master planning

Biography

Daryll completed his Part 3 at the University of Westminster with Distinction mid-2020; after receiving the Bartlett medal for his innovative material-work and experimental thesis - expressing technical knowledge through concrete sculpture. His projects continue to hold great interest in community building environments and the proliferation of education - contributing to multiple student residential proposals, community centres and educational facilities across London. Recently, he has excelled in RIBA stages 3-5, leading a range of mixed-use, larger-scale London projects including: high-end mixed-use residential schemes, modern student accommodations, bespoke office retro-fitting and one-off city-wide viewing galleries

Projects:

Ilderton Road, Southwark

New build - 308 student accommodation rooms alongside 58 modern affordable apartments, roof terraces and 9 large high street commercial workspaces.

client	TRIBE
cost	£35m (estimated)
construction	RC frame with LGS infill
status	Est. Completion 2023

The Laundry Building, Hackney

New build - 58 high-end residential unit with 7 modern commercial work-spaces

client	Aitch Group
cost	£25m
construction	RC frame with LGS infill
status	Estimated Completion 2023

Biography

Helen studied at the University of Portsmouth where she was awarded a RIBA prize for excellence for her thesis design 'the museum of secrets'. Helen re-joined the practice in 2019 as a part II Architectural Assistant, and subsequently qualified as an Architect at Westminster University. She has a broad experience of residential projects having previously worked through planning and construction stages.

Projects:

Commerce Road, Brentford, London

76 residential apartments

client	L&G
cost	£15m
construction	RC frame, traditional brick & block
status	est. completion 2021

Free Wharf, Shoreham-by-Sea, West Sussex

Phase 1: 137 residential apartments

client	Southern Housing
cost	£40m
construction	RC frame, traditional brick & block
status	est. completion 2023
involvement	Stages 4-5

Biography

After gaining his Part I diploma from the University of Kent, Marcello moved to London to study at London Metropolitan University for his Part 2 and finally at the University of Westminster for Part 3. Before joining Alan Camp Architects, his work experience included mostly residential architecture and ranged from a small house extension in Reading to a 900-unit residential scheme in Stratford, London. Outside of work, he enjoys the many cultural activities the capital has to offer, such as museum visits, classic film screenings and music concerts.

Projects:

Wickside, Hackney

Mixed use, residential led development, incorporating retained heritage assets, a craft brewery, casting foundry and the creative industries, around a new canalside linear park.
