

Courtyard Dental Centre

Medicine Hat, AB

In 1993, Dr. Kirk Ewasechko and Donald Fisher worked together to envision a new facility that would house their respective practices. Alvin Reinhard Fritz Architect Inc. was called upon to provide Prime Consulting Services. Multiple interviews of all the end-users served as the basis for the Architectural Program and design concept.

After the unique massing of two “U” shaped building components, around a central courtyard, was established, the finishes were determined. A special run of brick by the local IXL plant called “Centennial” had been utilized in the Court House expansion. The same brick was selected to create the historic ambience which blended the project successfully with its environment. Detailing of the masonry also took into account the aesthetically pleasing lines of the Court House, emulating the historic style of this neighbouring landmark.
