Benefits of Wood Fence

Wood fences offer a range of benefits that make them a popular choice for property owners. The natural aesthetics of wood lend a warm and timeless charm to any property. The rich grains and earthy tones of wood create a welcoming and visually appealing boundary that complements various architectural styles.

Our Story

Amtech Fence was established in 1995 as a local supplier to the fence trade. Beginning as a cedar fence manufacturer and chain link distributor, we soon expanded into making fence out of PVC material. As a pioneer in the vinyl fence industry, Amtech quickly developed proprietary systems for producing durable and eco friendly vinyl fencing without the maintenance associated with traditional wood fence. Since then we have partnered with Barrette Outdoor Living to distribute their ornamental aluminum and vinyl products. By doing things the right way with strong ethics and values, as well as forging great relationships along the way, Amtech has grown into one of the largest fence and railing producers in the country. Amtech continues to stay focused on creating new innovative products, while looking forward to creating beautiful high quality fence and railing that allow families to enjoy their backyards for years to come.
