

Fixed Earn

Product Description

What is fixed earn?

A fixed earn product is an investment that provides a regular and predictable return in the form of interest. It offers a steady stream of income rather than the potential for significant capital gains. Unlike option vaults, fixed earn is a low risk and low rewards products, often attractive to investors who are seeking a stable source of income and are willing to trade off the potential for higher returns in exchange for a more predictable investment.

What are the benefits of fixed earn?

- **Reduced Risk** - Fixed earn can offer a lower level of risk compared to other investment strategies because you are not relying on the market volatility to generate the yield.
- **Predictability** - With a fixed return, you will know exactly how much you will earn from your investment, making it helpful for planning and budgeting purposes.
- **Passive Income** - Depositing your digital assets for fixed returns can be way to generate passive income, as you do not need to actively manage your investments.

Definitions

Digital Assets:	Virtual currencies that represent a value. Cryptocurrencies fall under this asset class.
Stablecoins:	A cryptocurrency that is typically pegged to a fiat currency (eg. USD) therefore considered relatively stable in price. Popular stablecoins are USDT and USDC.
Fixed Earn:	A financial product that provides a regular and predictable return on the deposit principal investment.
Implied Volatility:	A metric used to capture the market's forecast of the likelihood of price movements of an asset price.
APR:	The annualized yield that the depositor receives when exercising options.
Settlement:	The amount you receive at maturity. The currency depends on how the market price compares to the strike price upon maturity.
Maturity Date:	The option expiration date, as well as the date that the option is exercised.
Tenor:	The length of time before an option expires. Often expressed in days.
Terms Sheet:	An agreement outlining the basic terms and conditions under which the option will be exercised.

Risk Disclaimer

Investing in this product involves market risk. Changes in price, level or value of the underlying asset can be unpredictable, sudden and large in volume. Such changes may result in the price or value of the asset to move adversely to the interest of the investor and may negatively impact the return on investment. In extreme circumstances, the investor may lose all, or a significant proportion of the original investment.
