wim.van.acker@augustleadership.com

PRACTICE AREAS

Industrial, Automotive, and High-Tech

EXPERIENCE

25 Years

PROFESSIONAL QUALIFICATIONS

MSc Chemical Engineering, Delft University of Technology

BSc Mechanical Engineering, Delft University of Technology

With over 25 years of recruiting experience, Wim has served automotive and diversified manufacturing clients for both publicly and privately- held clients, including original equipment manufacturers, Tier One and Tier Two parts automotive suppliers, engineering service providers, management consultancy firms, as well as aftermarket manufacturers.

Wim has conducted assignments for Chief Executive Officers, Vice Presidents of Sales and Business Development, Chief Technology Officers, Vice Presidents of Engineering, Divisional Presidents, and Functional Heads with a concentration in operations, supply chain management, engineering, and sales and business development leadership roles.

Wim also does a lot of work for high-tech energy storage companies, such as filling extremely hard-to-fill roles for scientists and highly qualified engineers in Research, Development, and Engineering for Lithium-Ion Batteries.

Before joining August Leadership, Wim was a client Partner with two executive search firms for fourteen years and prior to that a Managing Partner with a global management consultancy firm, Roland Berger, for 12 years in North America and South America.
