

The DeFi Stack Made for Africa

In the coming decades, Africa's growth is set to be one of the biggest in history. GDP is expected to increase from \$2 trillion to \$29 trillion by 2050.

We started with a token, and now, thanks to strategic partnerships and innovative technologies, we are on our way to creating an entire ecosystem to bank the 350m+ unbanked and provide infrastructure to economically unite the continent.

Join the African
Economic Revolution

Africa Grain & Seed

A pilot program for 50k farmers in Zimbabwe to gain access to blockchain via KamPay, providing micro lending and with plans to expand to a million by the end of 2022.

SharkCoders

In order to shape the future of crypto, we have partnered with a Portuguese coding school to build an online coding academy for children and teens throughout Africa.

diginexESG

Our latest partnership allows us to offer blockchain based environmental and social impact reporting to businesses in the continent.

Lotteries

Partnering with 7 countries in Africa, Kampay holders can participate in relevant state lotteries through payment and utility integration. This is powered through a partnership with the Glitch, a network designed for trustless money markets and decentralized financial applications (dApps), which keeps costs low.

MELD

Growing our ecosystem is a priority to guaranty true adoption and usability. By partnering with MELD, KamPay holders can now use their platform for borrowing and lending both DeFi and Fiat.

KamMobile

A new technology that will allow people to control crypto through SMS, meaning no need for a smartphone or even internet connection. Users will be able to send a text, open a crypto wallet and eventually be able to buy and sell crypto via mobile money.

KamWallet

Our bespoke payment platforms. The first version is made for merchants and will be onboarding e-commerce and physical stores to accept crypto focused primarily on KamPay token.
