# » ABOUT ISCOPE

Since opening in 2017, iScope has built a strong reputation for its commitment to excellence in scoping, project management, structural repair, and the provision of welding qualification and training services.

Situated in Paget, the mining repair hub of Mackay, our team provides invaluable guidance and unwavering dedication to fulfilling our clients' varied requirements. Drawing from a wealth of collective experience exceeding 50 years, our specialized team is fully committed to every step of the process, encompassing analysis, technical assistance, budgeting, and regular inspections.

We pride ourselves on our meticulous attention to detail and strive to offer expert advice at all times.

Our team's extensive experience across a range of projects and industry sectors allows us to provide the right system, processes and documents for all quality assurance needs. With a strong track record, we have established ourselves as a trusted partner for both national and multinational clients operating within the mining industry.

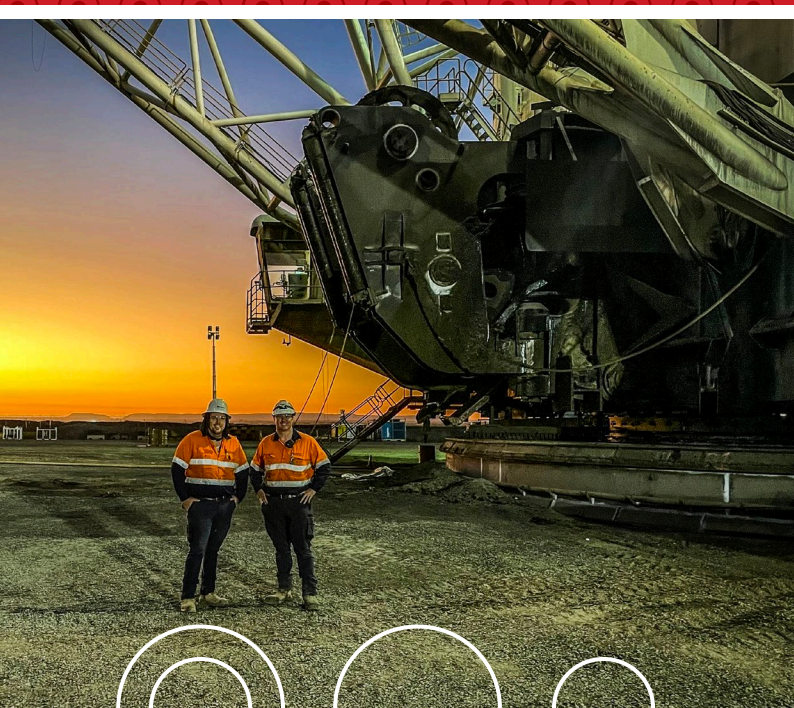

# OUR SERVICES

Our extensive service portfolio covers a wide array of offerings, including fully independent scope of work, development of welding procedures, welding qualification and training, monitoring of structural conditions, management of structural repairs both on-site and off-site, and project management for the construction of new OEM components on behalf of the principal.

Recognizing the importance of on-site structural repair management, we offer a range of services tailored to meet our clients' needs. These services include the development of Structural Repair Scopes of Work, creation of structural repair procedures, on-site supervision, as well as both on-site and off-site structural repair management.

We cover all facets of welding management including writing contract technical specifications for vendors/principals to set project quality parameters, to the development of inspection and test plans (ITP) to ensure all critical areas are identified.

All weld procedures we supply are developed by our highly trained, qualified, and certified welding specialists adhering to all relevant Australian Standards and when requested, International Standards.

# WELDING TRAINING & SERVICES

Our team provides welding procedures, training/qualification, supervision, inspection, and technical support.

Our range of services encompass complete weld procedure and welder qualification certificate solutions. We handle various aspects, including the preparation of WPQ (Welding Procedure Qualification)

and WPQR (Welding Procedure Qualification Record) documentation, conducting thorough weld inspections and safety checks, as well as performing Welder Qualification and Weld Coupons testing.

Furthermore, we specialize in the development, review, and issuance of welder qualification and certificate packages. Our meticulous approach ensures that all necessary documentation is provided to establish welder credentials.
