

HMI CONVERSIONS

ANY HMI CONVERTED TO PROFACE

THE MOST DIFFICULT PART OF MIGRATING TO ANOTHER BRAND OF HMI IS THE CONVERSION COSTS. VENDORS USED TO DO THIS FOR FREE, IT IS 2020 AND NOTHING REMAINS THE SAME. THEY WILL STILL DO THIS IF YOU HAVE LIKE 100 UNITS, BUT WHAT IF YOU ONLY HAVE A FEW? THERE ARE ALSO PLENTY OF AUTOMATED CONVERSION TOOLS, BUT MOST OF THEM DO NOT WORK BASED ON OUR TESTING. OUR SOLUTION IS \$60* PER HOUR ON THE CONVERSIONS. THIS IS A GREAT PRICE FOR ENGINEERING AND WILL LAST ALL OF 2020.

A. YOU HAVE A COPY OF THE ORIGINAL PROGRAM:

- Awesome, this helps tremendously and will save a great deal of effort and cost.

B. YOU HAVE A PRINTED COPY OF THE ORIGINAL PROGRAM:

- No problem, this just means more work and we will need to make sure all of the information is available to proceed.

C. YOU HAVE NOTHING BUT AN HMI LOOKING AT YOU:

- Again, no problem, this just means a lot more work and we will need to make sure all of the information is available to proceed including a visit to possibly pull the program out.

Conversions available for: Rockwell (Allen Bradley), Siemens, Red Lion, GE, Toshiba, Telemecanique, AVG, EZ-Automation, Maple Systems, ABB, Rohtek, Phoenix, Hy-Tech, Beijer, Mitsubishi, Automationdirect, Advantech, Delta, Eaton, Fuji, Omron, Hitachi, and many more....

* An application review based on A to C (situations listed above) will need to be completed prior to proceeding with special cost.

Pro-face

Serving Industry Since 1947

USING AUTOMATIONDIRECT?

WHY NOT USE A BETTER HMI FROM THE ORIGINAL HMI COMPANY THAT INTRODUCED THE TECHNOLOGY TO THE WORLD. BETTER PRICE AND BETTER FEATURE SET.

PROFACE GP4000E:

- 10 and 7 inch WVGA with TFT color LCD displaying 65,536 possible colors
- Ports: RS-232C x1, RS-422/485 x, Ethernet x1, USB (Type A x1 and Type mini-B x1)
- 90+ Communication drivers
- Realistic 3D parts
- Animation
- Trending and data analysis
- Security features
- Multiple languages
- Supports both landscape and portrait modes
- Advanced software features supported on an economical hardware platform
- Compatible with EZ Series HMI USB accessories (Towerlight, Fingerprint Reader, Illuminated Push Buttons, Numpad)

Pro-face

We also do the electronic repairs on all of these brands of HMI's if the conversion does not make sense. Being useful is all about knowing when to back up and punt versus trying to gain additional yardage with time still on the clock.
