

#VFD ETHERNET OPTION CARD - IN STOCK

AB (ROCKWELL) REMOTE I/O AND EIP COMMUNICATIONS

B&D DESIGNED THE CARD TO ALLOW AN ABB DRIVE TO WORK ON A VINTAGE AB REMOTE I/O NETWORK; HOWEVER, WITH THE ETHERNET CHIP SHORTAGE, THE DESIGN OFFERS THE UNIQUENESS OF ETHERNET I/P (EIP) AS WELL. THE OPTION CARD IS IN STOCK AND READY.

BASIC DETAILS:

- The design natively works with ABB ACS880, ACX580, and DCS880 drives without programming or hardware modification (used to replace the FENA and FEIP option cards)
- B&D can adapt them to work with any brand of AC or DC drive for a onetime fee
- IP20 Din rail version available
- Over two years of development with a partnership between SoftPLC and B&D

\$800.00 per card*
**25% off when purchased with a drive*
