

INFRARED BARRIER

OPTEX SL350 (100m)

Ref INV-SL350-L

The SL-350 is an outdoor, battery-powered infrared barrier ideal as an outdoor alarm or early intrusion detection system for open areas and small perimeters. The Wireless Dual Beam Detector offers great flexibility in terms of power options, including the use of 2 LSH20 battery packs and a hybrid configuration where the receiver can be hardwired.

Strengths

- No civil engineering, no wiring
- Low consumption up to 5 years of autonomy
- Protection against vandalism
- IP65

Specifications

IR range	100m
Dimensions	452 x 83 x 138 mm, weight 3,3kg
Number of beams	4
Alarm information	Passing, Autoprotection, Low battery, fog
Alarms transmission	LoRaWAN 1.0.2
Radio frequencies	ISM 868MHz
Communication protocol	LoRaWAN 1.0.2, class A, ADR
Power	2 or 4 Li-SOCl2 3.6V batteries per emitter/receptor
