TELESCOPING STINGER

The Logan Telescoping Stinger is not your typical stinger/pup. It is designed for durability, functionality, and safety. One telescoping stinger has the ability to replace two standard stingers on a piler or evenflow. Hydraulic functions (including telescope, lift, lower, and swing) allow the operator to place the stinger exactly where required – without repositioning the truck.

4 feet of telescoping capability is provided for accurately placing your hopper.

A wireless remote is an option for controlling the hydraulic functions while remaining clear of the conveyor.

Options include solid belt, belted chain, finger rollers in the hopper, electronic speed control and hydraulic swing.

Hydraulic swing prevents operators from repositioning during truck dumping, and also prevents shifting on uneven ground.

SPECIFICATIONS

MODEL	LTS3646	LTS4252
Width	5'4"	5'10"
Belt Width	36" over 46"	42" over 52"
Length (retracted)	11'	11'
Length (extended)	15'	15'
Machine Weight	2,050 lbs	2,170 lbs
Product Volume	280 TN/HR	325 TN/HR
Electrical	208V/460V/575V	208V/460V/575V
Horsepower	4	4
