Web Pro Sizer Field Sizing

Accurate,
High Volume,
Gentle Handling

www.loganfarmequipment.com

SIMPLE. SMART. STRONG.

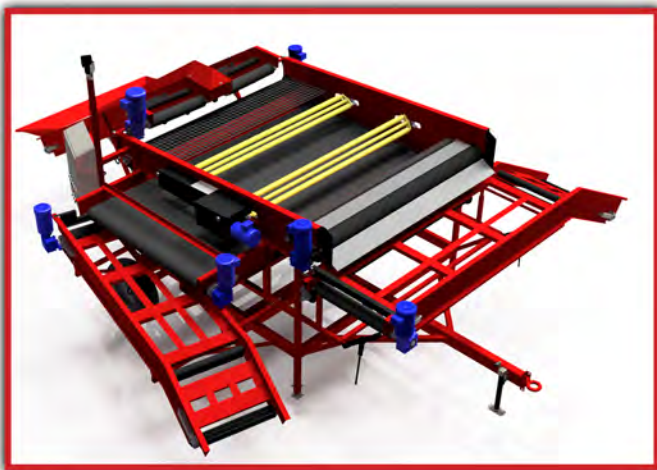

WEB PRO BELT SIZER

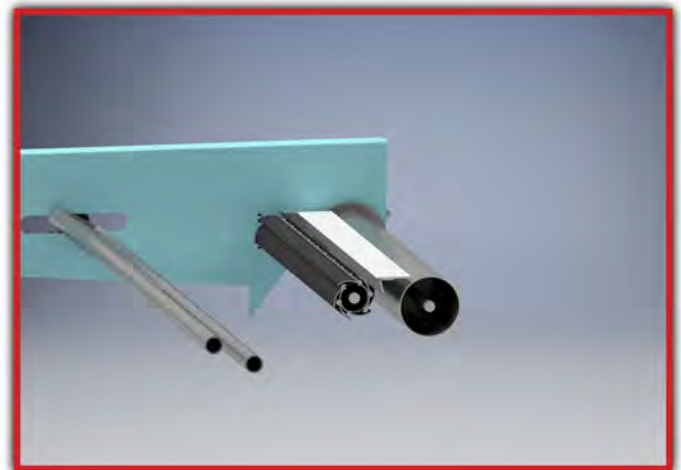

The Logan Web Pro Belt Sizer for field sizing provides gentle, soft, highly accurate sizing with large volumes. Connecting additional machines provides more sizes.

These highly accurate sizers use a soft-covered, durable belt for consistent sizing over time. Round or square holes are ordered by the millimeter and a quick release for easy screen change is provided.

Dual independently driven shaker/agitators with Variable Frequency Drive (VFD) provide custom agitation and bouncing of the sizing belt allowing your product another chance at sizing. The agitator assembly spans the width of the belt as it engages the belt. A secondary benefit is that the rollers will engage the underside of product stuck in the holes.

Dual independently driven shaker/agitators.

A driven push out/lifter roller at the discharge end of the machine helps to gradually push out stuck product without damage.

WEB PRO BELT SIZER

For less than ideal conditions the field machine uses dual drives on each end of the machine for driving the sizing belt and spring tensioned scrapers for removing heavy field soil from the pulleys.

An option is an adjustable height elevating conveyor with two 30" wide belts that have a wide angle discharge for equally distributing the product on to the sizing belt (below).

Multiple conveyors with reversing capability for maximum handling flexibility.

Connect several web belt sizers together (Left) for greater versatility.

The Logan Web Pro Sizer is sandblasted, primed and painted with a high quality polyester urethane paint. This process provides a durable high gloss color with excellent corrosion protection.

LOGAN

FARM EQUIPMENT

Specifications

Model	Logan Web Pro Sizer LWP96120 Field (Pictures Shown)
Weight	3,400lbs
Horsepower	8hp
Height	Adjustable
Width	11'0"
Length	10'6"
Belt	96"
Capacity	220TN/HR

Models

- 60" x 10' sizer w/72" wide undersize cross conveyor
- 72" x 10' sizer w/72" wide undersize cross conveyor
- 96" x 10' sizer w/72" wide undersize cross conveyor

Options

- Integrated electrical panel, housing all electric drives.
- Two 30 inch elevating feed conveyors
- Additional oversize and undersize transfer conveyors
