1) externally accessible

The solid rubber housing is produced using a press and vulcanization process. In combination with the special material employed, this allows us to achieve those qualities that set this distribution box apart (see page 1.0).

Special Features:

- hinge with a solid V2A axis
- 3 M6 screws made of V2A steel, undetachable, guaranteeing secure and easy closure of the distribution box
- on request: 3 star-handle screws, undetachable, for opening the box without tools
- designed to accommodate a closing mechanism
- protection guards are arranged clearly under the lid, protecting against accidental contact
- 4 sturdy feet provide 40 mm floor clearance and a firm foothold
- inclined and overhanging lid that is also furnished with a rain deflector spanning all sides
- large, stable carrying handle
- the inside of the distribution box also displays a clear, maintenance-friendly design

- with a padlock
on request

- with star-handle
screws on request

- lid functionality is guaranteed, even when implemented under rough conditions and subject to high mechanical strain
- protection guards cannot be tampered with by unauthorized persons - SAFETY
- trained personnel have quick access to the safety devices - TIME SAVINGS
- only key holders can open the distribution box
- live parts cannot be touched, facilitating easy and safe operation
- perfectly suited to nearly all ground conditions
- rain and spray water cannot build up on the housing
- thanks to a special shape (recessed grip), the distribution box is comfortable and safe to carry during transport
- maintenance work can be carried out quickly and simply - COST SAVINGS
