

TOP REASONS FLEETS CHOOSE ➔COPILOT®

1

Safe, Compliant, Commercial Navigation Down to the Last Mile

Keep drivers safe and efficient with navigation that takes into account vehicle dimensions, load restrictions, and roadway attributes, as well as verified, commercial location data, such as truck entry and exit gates.

2

Operational Consistency with Industry Standard PC*MILER

CoPilot is rooted in the same routing engine and map data as PC*MILER. You can feel confident that when you use PC*MILER for back office planning and CoPilot for in cab navigation, your business operations are consistent from the back office to the vehicle.

3

Visibility and Insight for Dispatch Operations

Our fleet management tools help the back office monitor out of route events and measure driver performance through post-trip analysis of the planned versus actual route. Even more, fleet managers can remotely configure and manage mobile application settings.

4

Drivers Depend On It

We offer drivers parking and amenity information at commercial locations like truck stops and distribution centers to alleviate stress and provide options for a better work life balance. Miles billed are miles driven.
