

LEVERAGE YOUR DATA TO INCREASE VEHICLE UPTIME

Fleets have the data to improve vehicle reliability. But analytics are challenging and expensive. Data can be messy and unhelpful. Short on technicians and drivers, fleets need data-backed support to avoid unplanned downtime and keep vehicles out on the road.

SOLUTION

UPTAKE FLEET CAPABILITIES

With Uptake Fleet, you can tap into the value of your data. It uses your existing telematics, sensor, OEM fault code, and work order data and leverages our 189 off-the-shelf data science models to detect pending issues at the component-level before they result in failure. Uptake Fleet empowers drivers, technicians, and shop managers to increase uptime, mitigate the risk of roadside breakdown, schedule proactive service, and efficiently manage spare parts inventory.

UPTAKE FLEET FOR INCREASED VEHICLE AVAILABILITY

- Identify trip-ready and high-risk assets in your fleet at a glance
- See failure insights from machine learning predictive models
- Filter insights by time, severity, location, and affected systems
- Dig into supporting evidence that indicate vehicle issues
- Prioritize and plan repairs based on vehicle conditions
- Create service cases and push them into maintenance management software for repair
- Proactively begin service with remote diagnostics and recommended steps

20%

reduction in roadside breakdowns

8-10%

improvement in technician efficiency

8%

increase in uptime

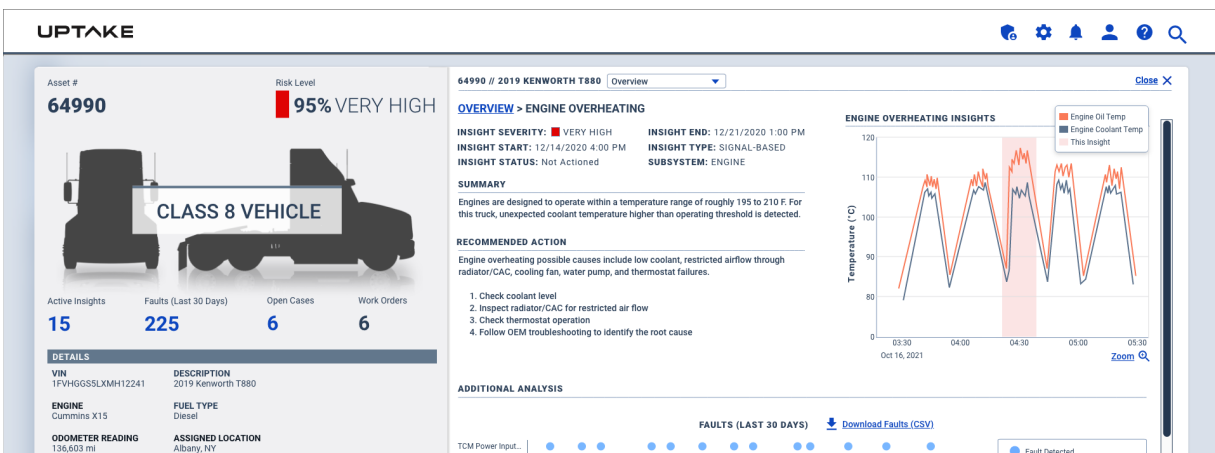

12%

decrease in maintenance costs

WITH UPTAKE FLEET, YOU CAN:

- Prevent and mitigate roadside breakdowns and derates
- Convert unplanned downtime into planned service
- Bundle maintenance events
- Perform high-value maintenance tasks
- Increase PM and repair efficiencies
- Increase preventative maintenance (PM) and repair efficiencies
- Proactively source parts replacements and cut inventory holding costs
- Increase vehicle availability with extended service life
- Promote driver satisfaction and retention
- Enhance customer satisfaction and brand reputation

More than 200,000 commercial vehicles are using Uptake Fleet to predict and prevent failures before they happen. By using Uptake Fleet, you can turn your data into intelligence that improves shop performance, vehicle uptime, driver retention, and your fleet's bottom-line.
