

Motive

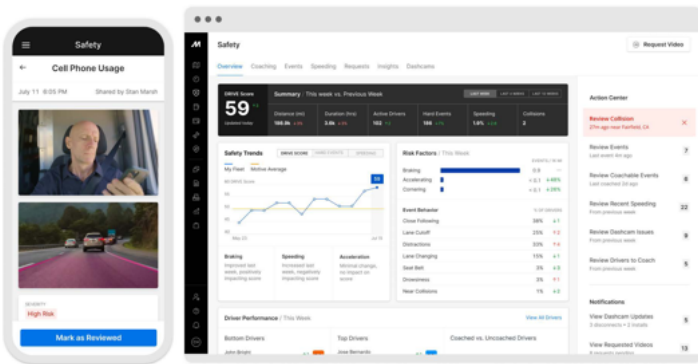

Create a comprehensive safety platform with Motive

Motive, the leader in Automated Operations, and Platform Science have partnered to provide customers with a new integration that leverages Motive's Safety Solutions to enhance their fleet safety.

The Motive Difference

Motive builds technology to improve the safety, productivity, and profitability of businesses that power the physical economy. The Motive Automated Operations Platform combines IoT hardware with AI-powered applications to automate vehicle and equipment tracking, driver safety, compliance, maintenance, spend management and more.

Less time wasted, greater visibility, and improved safety. As an approved vendor for safety solutions on the Platform Science Marketplace, Motive enables shared customers to create an integrated, unified safety platform — a single source of truth. Mutual customers will have access to safety data from their Motive AI-powered dash cams directly inside the Platform Science platform, allowing them to manage their fleet safety operations quickly and more efficiently.

With Motive, see safety in a whole new way

Motive's AI-powered dash cams store recordings for up to 104 hours and can recall video for any specific location or vehicle in a fleet during that time, enabling carriers to have a clearer picture of what's happening on the road. By utilizing this high-quality data, fleets can gain visibility into their operations, prevent accidents and create safer outcomes.

FEATURES + BENEFITS

Reliable AI

Motive's AI detects unsafe behaviors in real time with fewer false positives.

Collision Detection

Advanced collision detection alerts managers of accidents with leading accuracy and speed.

Video Recall

Access dash cam footage from the last 30 to 235 hours to see exactly what happened.

AI Omnicam

Regain time and control with 360° view of each fleet vehicle. The AI Omnicam provides comprehensive side, rear, passenger and cargo monitoring.

Privacy Mode

Motive helps protect driver privacy by providing the option to disable the driver-facing camera while drivers are off duty or when the engine is idling.

DRIVE Score

The DRIVE risk score evaluates performance over time for an accurate measure of driver risk. DRIVE is 5x more accurate at predicting accidents than the industry's leading safety score.

the purview of a single company or sector. It's about the wider ecosystem developing solutions that drive it forward. Our integration with Platform Science means carriers can use more high-quality data to create better outcomes for the whole industry and the wider supply chain."

*Drew Quinlan,
VP of Business Development at Motive*

Together, Motive and Platform Science are advancing the use of data to improve safety and efficiency for commercial transportation companies. Connect your Motive Safety Solution data to your Platform Science platform, and transform the way you manage fleet safety.
