

**Stay ahead of the curve
with Drivewyze.**

Drive on.

**It's impossible to know what's
around the corner...or is it?**

Empower your drivers to make safer decisions en route with in-cab notifications that let them know about potential hazards well in advance, giving them the time they need to safely respond to the road conditions ahead.

*Learn how Safety+ can
strengthen your safety initiatives*

PREVENT INCIDENTS AND CITATIONS EN ROUTE

Drivewyze Safety+ makes it easier to talk to your drivers exactly when they need to hear you, whether that's ahead of available parking, severe weather, known citation zones, high theft areas, or other critical locations across North America. Improve communication, reinforce good performance, and encourage safer decision-making with our proven notification system.

Easily build your own alerts that use audio and visual cues keep drivers informed as they approach hazardous sections of their route or places with specific protocols, delivered on the devices they already use in-cab.

EXPLORE WHAT IS WORKING, AND WHERE, WITH INSIGHTS

Explore actionable insights with reporting that has a unique focus on high-risk locations, so management can quickly identify drivers who need attention without sifting through hours and hours of events.

Drivewyze Safety+ enables you to quickly identify drivers who need attention
