ADMINISTRATION

- 👥 Members
- ⚙ Devices ⌄
- ○ Modules

2 ↱ ☐ Showing the stopped operations | **Create**

**3** Download the Android app | Download instructions

2 - Through the application

1 Go to the "Operations" page

2 Click on the icon to open the download pop-up (top right of the page)

3 Click on the button to download the application
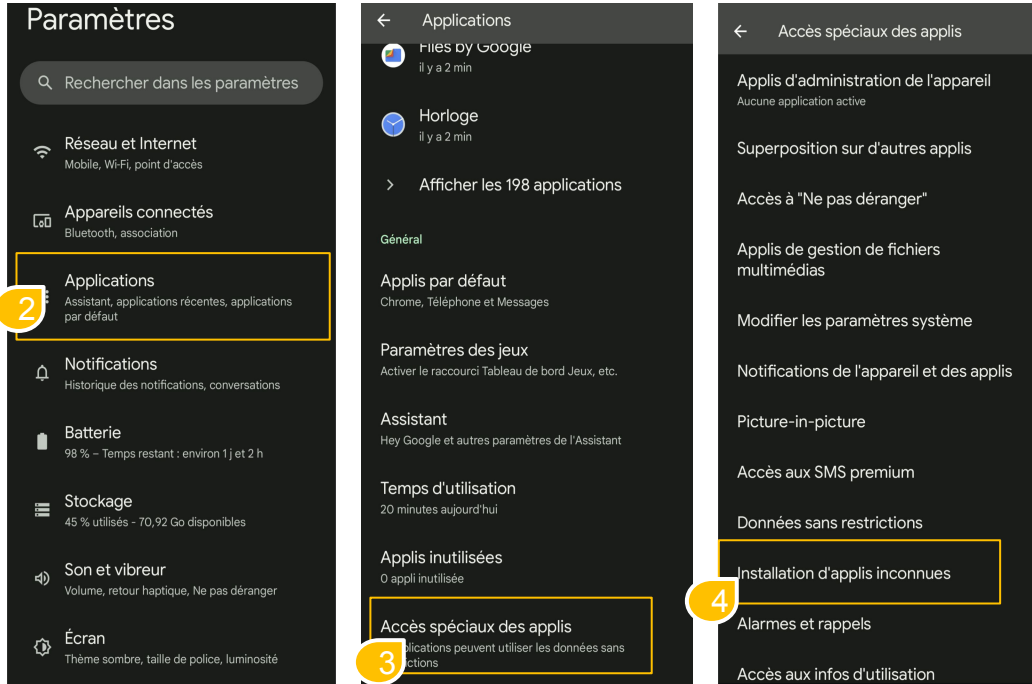

Authorize applications from unknown sources

If you've never installed an application outside the Play Store, Android may ask you to authorize it.

1 Go to settings

**2** Authorize downloaded applications on Chrome (switch to the right)

Authorize applications from unknown sources

Otherwise, you can access this menu from the handset settings (the method may differ depending on the version or model).

1 Go to device parameters (or settings)

2 Go to the "Applications" menu

3 Click on "Special app access".

4 Finally, select "Install unknown apps", choose Chrome and follow the instructions on the previous slide.
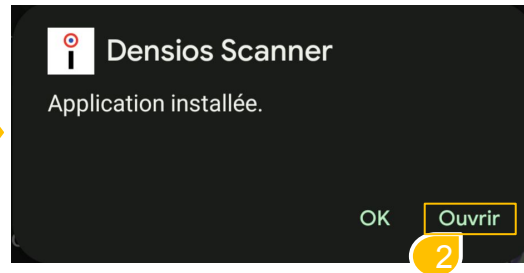

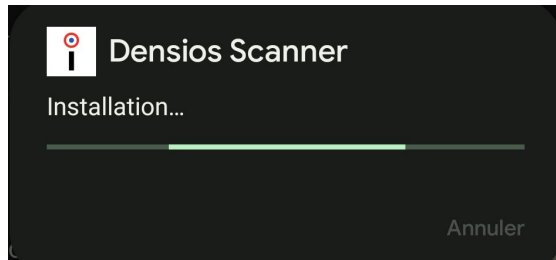

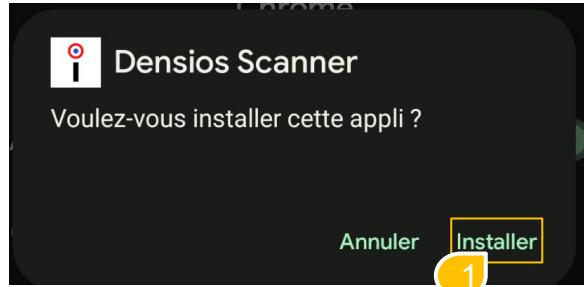

Download

The method may differ from one Android version to another, but is broadly similar.

1 Before downloading, Android warns you that the file may be corrupted. Don't worry, it's safe. Click on "Download anyway".

3 Open it via the notification or via the file "densios-scanner.apk" in your file system.

1 Click on "Install" to start installing the application

2 You can now open the application

Authorizations

The first time you launch the application, it asks you for authorization to access your location.

Bluetooth and scanning

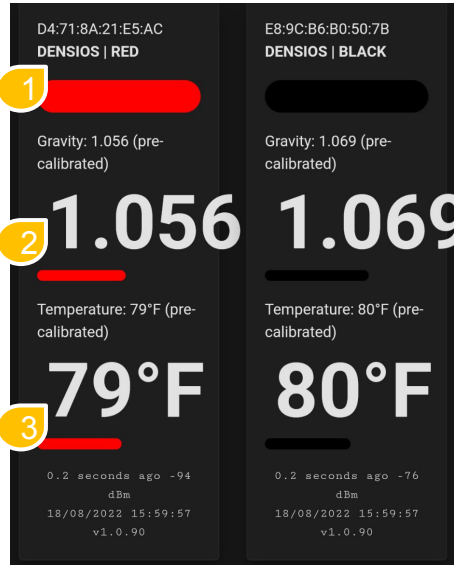

① Scanning for nearby Densios Scanner. Ensure Bluetooth and Location Services are enabled and DENSIOS is floating.   CLOSE

① The application will scan the densios. To do this, make sure Bluetooth is enabled on your device/ If it isn't, go to your device's settings to activate it, or scroll down the notifications pane (the drawer at the top of the screen) and activate it by clicking on the corresponding logo.
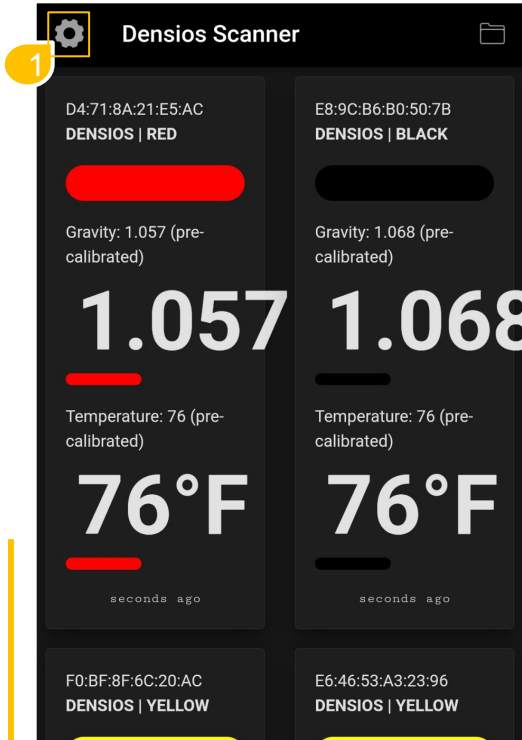

Presented information

For each densios scanned, you can access several information :

1 Densios identification: its unique mac address and, most importantly, its color

2 The density of the detected liquid

3 Temperature of the detected liquid

Changing units

If the unit of temperature measurement is not to your preference, it can be changed.

1. Click on the cogwheel at top left

2. Select the densios of which you wish to change the unit

3. Select the unit of your preference
