DIAMETOS

Snoring Diagnostics As Easy As Snoring Itself

Approach: Artificial Intelligence analyses the sound of snoring, and it does so in the comfort of your own bed at home.

Core technology: AI-based acoustic feature analysis of sleep-related respiratory sounds based on many years of interdisciplinary research involving experts in sleep medicine, anatomy, acoustic signal processing, artificial intelligence and machine learning.

Basis of technological edge: More than 8 years of fundamental medical and technical research and international patents.

Dr. Christoph Janott (CSO) and Heiko Butz (CEO) founded Diametos as a social impact company to help millions of people with the problem of snoring and the medical problem of Sleep Apnea.
