

Hear every on-screen rumble or explosion with the Cyclonix 18, as it effortlessly delivers low frequency effects at high sound pressure levels, for the ultimate cinema experience at home.

The Cyclonix 18 is a passive subwoofer that uses a single high excursion driver, mounted in a high quality MDF enclosure. The proprietary Krix 'X' brace system is used to eliminate panel resonances.

The giant 455mm bass driver features a 100mm voice coil, powerful vented magnetic circuit and double spider assembly. The optimum cooling system provides fast heat exchange and reduced thermal power compression.

The dual front-vented enclosure is tuned to achieve maximum output, resulting in an incredibly efficient subwoofer for high drive level applications, while the unit's proprietary Krix rubber feet provide improved acoustic isolation on hard and soft floor surfaces.

A separate power amplifier is required for this subwoofer and can be connected to the LFE output of any AV processor or receiver.

For the ultimate cinema experience at home, play it through Krix.

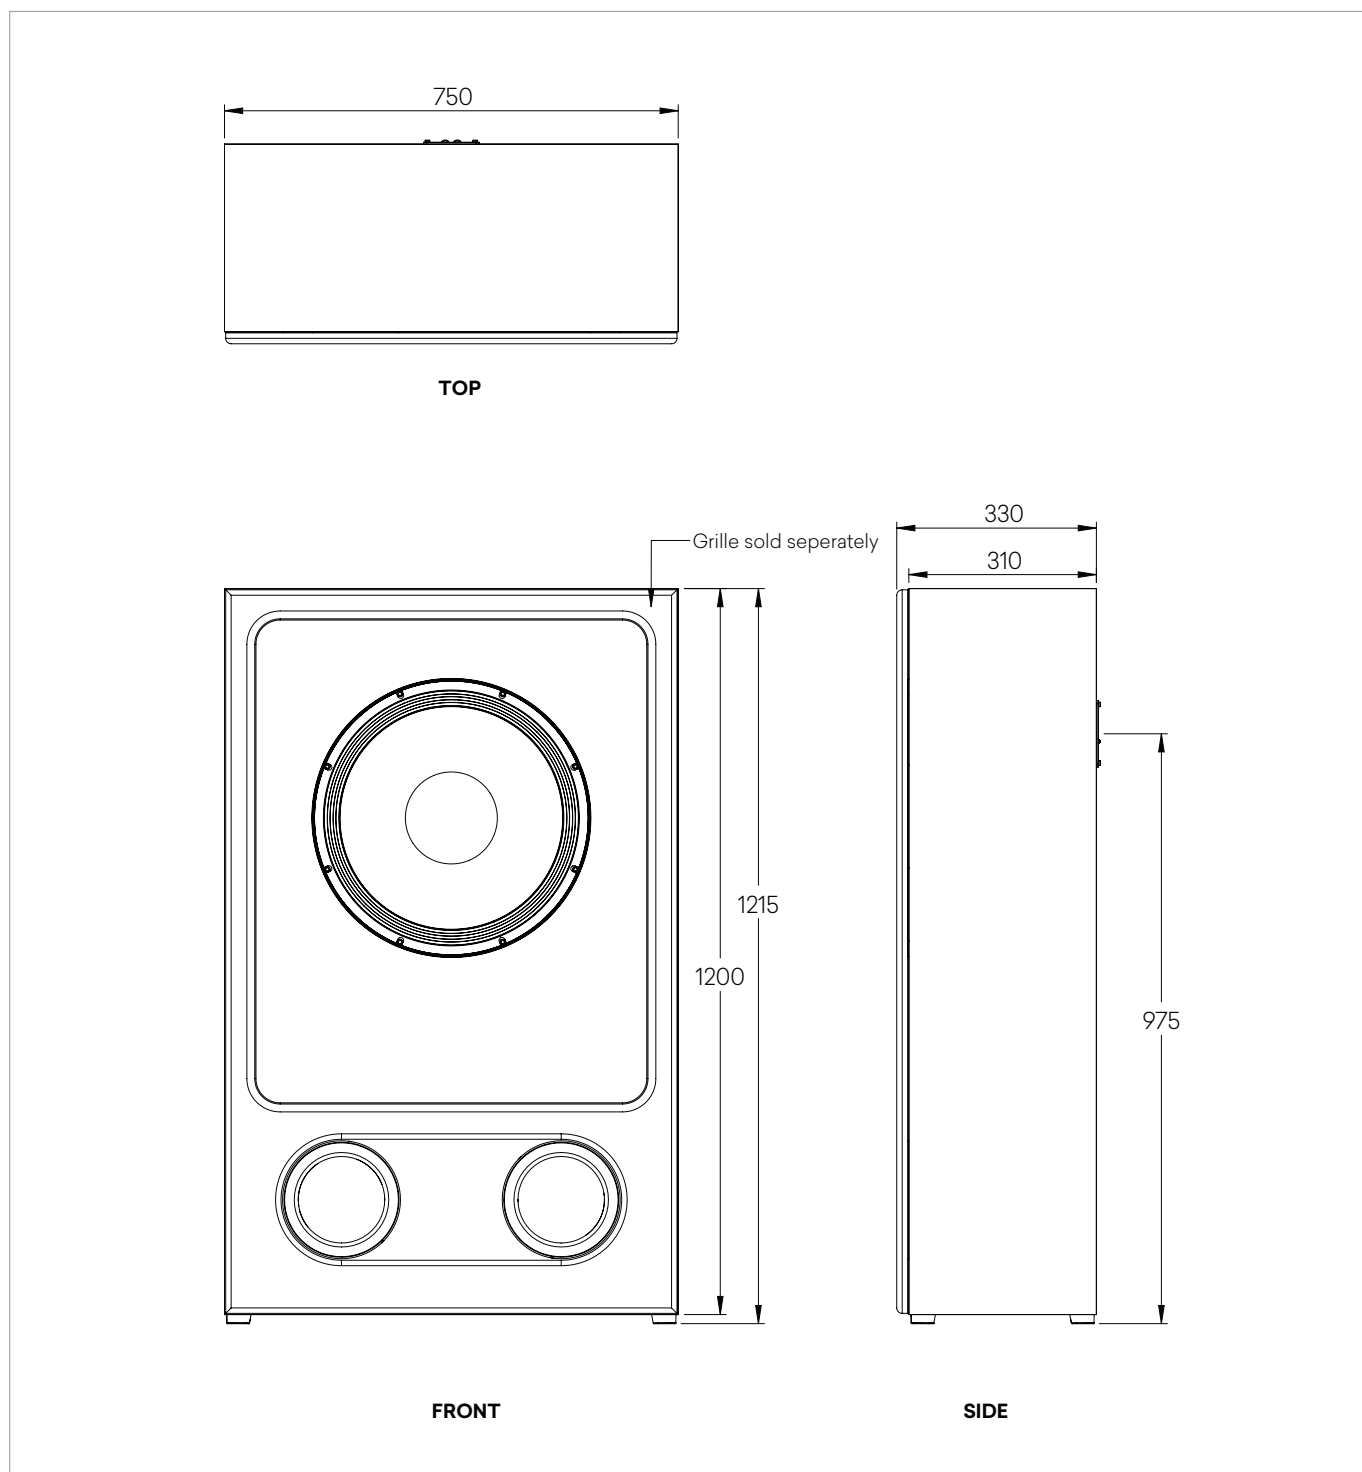

## FEATURES

- Can be used as a primary subwoofer or to complement Series MX systems
- Shallow design allows for greater placement options
- Optional grille available

Cyclonix 18	
Product revision	03
Frequency range	25Hz - 200Hz (in room response)
Amplifier power	250 - 1400* Watts RMS recommended amplifier power * The use of a power amplifier with high pass filter and soft limiter function is strongly recommended on this subwoofer
Recommended processing	High pass filter: 25Hz 24dB / octave Butterworth Limiter: 1000W (8 Ohms)
Sensitivity	100dB SPL (2.83V / 1m)
Low frequency driver	Single 455mm (18") paper cone driver. 100mm (4") edge-wound copper voice coil, dual spider assembly and vented magnet assembly
Enclosure type	Bass reflex, front vented
Inputs	High current spring terminals featuring a 5mm hole to accept up to 10AWG cable
Dimensions	1215mm high x 750mm wide x 310mm deep (330mm deep with optional grille)
Net weight	64kg
