Wilshire US Small-Cap Index™

As of June 30, 2023

The Wilshire US Small-Cap Index™ is the most pure and complete benchmark of the small-sized (in terms of capitalization) companies in the U.S. equity market. The Wilshire US Small-Cap Index is a float-adjusted, market capitalization-weighted index of the issues ranked between 750 and 2,500 by market capitalization of the Wilshire 5000 Total Market Index™. The components of the Wilshire US Large-Cap™, Wilshire US Small-Cap and Wilshire US Micro-Cap™ Index build back to the Wilshire 5000 without gaps or overlaps. The Wilshire US Small-Cap Index was released in 1996 with a time series of data beginning on June 30, 1978.

Objective

To benchmark the small-sized U.S. securities by excluding the Wilshire US Large-Cap and Wilshire US Micro-Cap securities from the Wilshire 5000 Total Market Index, the most pure and complete measure of the U.S. equity market.

Key Features

- The index is a subset of the Wilshire 5000 Total Market Index
- Includes all securities between the 750th and the 2,500th largest stocks in the Wilshire 5000 by market cap as of the March and September semi-annual rebalance
- Buffers are used to reduce index turnover
- Bulletin-board and thinly traded issues are excluded generally because they do not have readily available prices
- Weighted by float-adjusted market capitalization

The Wilshire Indexes℠ are calculated and distributed by Wilshire. It is not possible to invest directly in an index. Exposure to an asset class represented by an index may be available through investable instruments derived from that index. Wilshire makes no representations regarding the advisability of investing in investment products based on the Wilshire Indexes not sponsored, endorsed, sold or promoted by Wilshire. Index returns do not reflect payment of certain sales charges or fees an investor may pay to purchase the securities underlying the Index or investment vehicles intended to track the performance of the Index. The imposition of these fees and charges would cause actual performance of the securities/vehicles to be lower than the Index performance shown. Inclusion of a company in the Wilshire Indexes does not in any way reflect an opinion of Wilshire on the investment merits of the company.
