

FIREVIEW₄

REMOTE WELD CONTROL CONSOLE

Using the latest digital technology, the FireView 4™ displays and records live video of the welding arc in full colour.

Paired with the Gold Track™, the FireView 4™ enables precise control and weld quality monitoring for environments where remote welding is essential.

Remote Welding Control

Real-time Data Logging

Configurable Screen Design

Graphical Weld Programming

Touch Screen Controls

Durable, Portable Design

■ Quality Control

- Multiple user accounts
- Customized permission levels
- Password protection
- Real-time parameter overrides with limits
- Real-time graphical display of parameters
- Printable data logs

■ Video Weld Monitoring

- AVI / MPEG recording
- Full colour, HDR camera compatibility
- Full screen video image mode
- Automatic video recording on arc start

■ Standard Features

- Touchscreen controls
- Keyboard shortcuts
- LED intensity control
- Digital weld shades
- Built-in UPS
- On screen crosshairs
- Remote diagnostic capability
- Coordinated motion (advanced feature)
- Gold Track™ mounting kit included

■ Specifications

- 100Hz data acquisition and storage
- Size: 34" [860mm] L x 23" [580mm] W x 23" [580mm] H
- Weight: 180 lbs [82kg]
- Input Power: 120/240 VAC; 50/60 Hz
- Up to 4 camera inputs

■ Options

- Multi-monitor configuration
- Screen Designer
- Two way audio communication
- Overhead viewing camera
- CE certification

Compact shock-proof case designed for storage and transportation
