

Extreme weather: wildfires, hurricanes and thunderstorms

You are now a meteorologist, a scientist who studies and predicts the weather. It is your job to tell people about an upcoming storm and educate them on what precautions they should take to prepare. Choose one of the types of extreme weather from the video. In each box, draw and describe information that would help people be ready for the storm that is coming.

Location: Where does this type of extreme weather occur?

Conditions: What will people experience /see / hear/ smell outside?

Prepare: How should people prepare to stay safe?

Safety: Where should people go to avoid danger in this type of extreme weather?
