Converting tenths to hundredths

Convert each fraction to hundredths

$$\frac{5}{10} = \text{—}$$ $$\frac{2}{10} = \text{—}$$ $$\frac{9}{10} = \text{—}$$ $$\frac{4}{10} = \text{—}$$

Convert each fraction to tenths if possible

$$\frac{30}{100} = \text{—}$$ $$\frac{55}{100} = \text{—}$$ $$\frac{80}{100} = \text{—}$$ $$\frac{120}{100} = \text{—}$$

Find each sum or difference

$$\frac{6}{10} + \frac{3}{100} = \text{—} + \text{—} = \text{—}$$

$$\frac{9}{10} + \frac{47}{100} = \text{—} + \text{—} = \text{—}$$

$$\frac{7}{10} - \frac{7}{100} = \text{—} - \text{—} = \text{—}$$

$$\frac{85}{100} + \frac{1}{10} = \text{—} + \text{—} = \text{—}$$

$$\frac{72}{100} - \frac{2}{10} = \text{—} - \text{—} = \text{—}$$

$$\frac{44}{100} + \frac{4}{10} = \text{—} + \text{—} = \text{—}$$

Converting tenths to hundredths

Lucas was counting his marbles, and discovered that he had 70 blue marbles, and 30 red marbles. His sister, Isabella counted marbles and had 8 blue marbles and 2 red marbles. Lucas said he had a larger fraction of blue marbles, since 70 was larger than 8. Is he correct? Why or why not?
