## Magic Beads

### Materials

a long strand of plastic beads  
(the longer the better, such as  
the kind you might use on your  
Christmas tree),

a tall clear cup  
(plastic or glass will work)

### Instructions

1. Carefully wind the beads in a circular motion into the cup. This is important because you don't want them to get tangled.
2. Leave the end of the strand hanging out of the cup.
3. Holding the cup high in the air, give the strand a tug and watch as gravity does its job!
