1.5 System Summary

The Atmosphere system features filters, a fan, and UV lights. Air is actively drawn into the machine through the perforated sides, filtered and passed by the UV lights. This process captures particles within the machine, sterilizes the air and creates hydroxyls that are then released into space to sterilize the entire space.

1.6 User Access Levels

All operators must have read and understood the operators manual prior to use. All operators must follow the guidelines for use in their space.

2.0 GETTING STARTED

If used during working hours (for example 9 am-5 pm), UV lights require replacement every 12months.

WARNING: When servicing, use only identical replacement parts from In The ClearZone. Use of any other part could create a hazard or cause product damage. Please contact In The ClearZone for replacement support. In The ClearZone is not responsible for personal injury or product damage if parts are replaced incorrectly.

3.0 SAFETY INFORMATION

3.1 Work Area

Keep your work area clean and well lit. Clutter around the Atmosphere and dark areas invite accidents.

3.2 Electrical Safety

Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for the replacement of the obsolete outlet.

Protect the extension cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the product. Check extension cords before each use. If damaged, replace it immediately. Never use a product with a damaged cord since touching the damaged area could cause electrical shock resulting in serious injury. Constantly stay aware of cord location.

Unplug this product during lightning storms or when not in use.

Avoid shaking the machine to restrict the damage to UV lights.

3.3 Personal Safety

Dress properly. Keep your hair, clothing, and gloves away from moving parts. Loose clothes, jewellery, or long hair can be caught in moving parts or drawn into air vents. Avoid wearing loose-fitting clothes to ensure nothing becomes wrapped in the fan blade.

Do not use on a ladder or unstable support. Stable footing on a solid surface enables better control of the product in unexpected situations.

3.4 Product Use & Care

Do not use solvents when cleaning the machine. Most parts are susceptible to damage from various types of commercial solvents and can be damaged by their use. Use clean, dry cloths to remove dirt, dust, oil, grease, etc. If using solvents, apply them to a cloth and wipe them on external parts of the machine. No chemicals should be sprayed directly on the machine.

Do not use a product that is damaged or modified. Damaged or modified products may exhibit unpredictable behaviour resulting in fire, explosion, or risk of injury.

Do not insert fingers into the machine while it is running. If there is a problem with interior parts, please contact In The ClearZone immediately.

Do not crush, drop or damage any part of the Atmosphere.

Do not operate near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat. Do not operate near any flames or where there is a risk of flames. Following this rule will reduce the risk of electric shock, fire, or serious personal injury.

To reduce the risk of electric shock, do not use this generator near water.

For general disinfecting use only. Do not use near exhaust hazardous or explosive materials or vapours.

To reduce the risk of personal injury and electric shock, the Atmosphere should not be played with or placed where small children can reach it.

WARNING: Always unplug the extension cord from your product when you are assembling parts, making adjustments, cleaning, or when not in use. Unplugging the extension cord will prevent accidental starting that could cause serious personal injury. In The ClearZone is not responsible for injury due to the use of extension cord during assembly, adjustments, cleaning or when the machine is not in use.

3.5 Service

Have your Atmosphere serviced only by an In The ClearZone technician using only identical replacement parts. This will ensure that the safety of the Atmosphere is maintained.

Never service damaged parts yourself. Service of Atmosphere parts should only be performed by the In The ClearZone or authorized service providers.

Know your Atmosphere. Read the operator's manual carefully. Learn its applications and limitations, as well as the specific potential hazards related to this product. Following this rule will reduce the risk of electric shock, fire, or serious injury.

Save these instructions. Refer to them frequently and use them to instruct others who may use this tool. If you loan someone this tool, loan them these instructions also.

4.0 ELECTRICAL

4.1 Double Insulation

Double insulation is a concept in safety in electric products, which eliminates the need for the usual three-wire grounded power cord. All exposed metal parts are isolated from the internal metal motor components with protecting insulation. Double insulated products do not need to be grounded.

NOTE: Servicing a product with double insulation requires extreme care and knowledge of the system and should be performed only by an In The ClearZone technician. For service, we suggest you return the Atmosphere to your nearest authorized service centre for repair. Always use original factory replacement parts when servicing.

4.2 Electrical Connection

When using the Atmosphere at a considerable distance from a power source, be sure to use an extension cord that has the capacity to handle the current the product will draw. An undersized cord will cause a drop in line voltage, resulting in overheating and loss of power. Only round jacketed cords listed by Underwriter's Laboratories (UL) should be used. **WARNING:** Keep the extension cord clear of the working area. Position the cord so that it will not get caught on lumber, tools, or other obstructions while you are working with this product. Failure to do so can result in serious personal injury. Check extension cords before each use. If damaged, replace it immediately. Never use a product with a damaged cord since touching the damaged area could cause electrical shock resulting in serious injury

The Parties shall agree on a single arbitrator. If the Parties cannot agree on a single arbitrator, either Party may apply to the Ontario Superior Court of Justice sitting in Toronto for the appointment of an arbitrator. The rules for such arbitration shall be agreed upon by the Parties, but failing agreement shall be determined by the arbitrator. The arbitrator's failure to observe this limitation shall constitute grounds for vacating his award. The arbitrator shall have no power to direct ClearZone to deliver or release Products to Buyer until Buyer has fulfilled all of its obligations to ClearZone pursuant to the terms and conditions of all contracts involved in the arbitration. Each Party shall bear its own fees, costs and expenses with respect to any such arbitration except that the Parties shall share the costs of the arbitrator equally. The decision of the arbitrator shall be binding, final and conclusive and no appeal shall lie therefrom. Judgment upon the award rendered by the arbitrator may be entered in any court having jurisdiction.

Neither course of performance or dealing, nor usage of trade, nor prior writings or agreements shall be used to qualify, explain or supplement any of these terms and conditions. Failure by either party, at any time or from time to time, to require the performance by the other of any term hereof shall not constitute a waiver of such term or provision. The invalidity, in whole or in part, of any term herein, shall not affect any other term, each of which shall be enforced to the full extent permitted by law. Buyer may not assign or transfer any rights or obligations under any Sales Agreement or other agreement governed by these terms without the prior written consent of ClearZone. Notice shall be deemed properly given if sent by facsimile, confirmed by registered mail with return receipt, overnight courier mail, hand-delivered, or registered mail with return receipt. ClearZone shall be entitled to reference Buyer as a customer of ClearZone and utilize photographs of Buyer's applications utilizing ClearZone's products and marketing materials.
