## Specifications

**Product Name:** Mini Thermal Fogger

**Rated Power:** 1200 W

**Weight:** 1.3 KG

**Product Size:** 22 x 12 x 21 cm

**Power Cord Length:** 2.5 meters

**Capacity:** 200 mL

## Safety Precautions

To ensure correct use of the product, please read through all of the following safety precautions before use to avoid property damage or personal injury:

- Do not disassemble the product.
- Familiarize yourself with the product prior to use.
- Keep this product out of reach of children.
- When finished with the product, turn it off and disconnect from the main power supply.

## About the Product

The Mini Thermal Fogger is a disinfecting device designed to turn liquid disinfectant into steam. This is done through heating the liquid disinfectant into the state of vaporization. This process is very quick, transferring 22 mL of liquid per minute. This forms atmospheric pressure steam that can extend to those hard-to-reach areas and disinfect them within seconds.

## How to Use

- Plug the power cord into an outlet, then press the red start switch.
- Wait for the Mini Thermal Fogger to preheat for about 40 seconds.
- When the light turns green, the fogger is ready to be used and will start outputting fog.
- Adjust the output of the fogger to control the amount of steam that is emitted. Turn clockwise for larger amount of disinfectant, and counterclockwise for smaller amounts.

## Notes

- The fogger must be thoroughly cleaned with water following the use of any disinfectant products to prevent blockage.
- Be sure to use distilled water from time to time to prevent the cross contamination of different disinfectant solutions
