Challenges Teams Face

Challenges Learning & Development teams face for cybersecurity

- The problem is only worsening - a [study by ISSA]() revealed:
    - **62%** of respondents experienced rising workloads for the cybersecurity team
    - **38%** have unfilled open job positions
    - **38%** also noted high levels of employee burnout
    - **95%** said the skills shortage has not improved over the last few years
    - **44%** said the skills shortage worsened
- There is a disconnect between cybersecurity leaders and HR teams on hiring requirements - job descriptions, skill sets, and more.

Challenges Teams Face

> ❝**600,000**
> unfilled cybersecurity roles in the United States

Challenges Learning & Development teams face for cybersecurity

- Investing in your workforce
    - How to retain your team?
- Siloed learning between teams
    - How to know what your cybersecurity teams are learning?
    - What additional resources do teams need?

Partnership

Why Cybrary and Degreed Partnered

- What client problems needed solutions?

- How Cyber L&D stakeholders created wider understanding, urgency, and collaboration

- The importance of role-based learning and the consultative approach to training
