

# STRATUS SERVICES' GUIDE to CMMC Readiness & Certification

## Why Cybersecurity Maturity Model Certification (CMMC)?

### Get ahead of the competition.

Let Stratus Services' cybersecurity expertise elevate your CMMC compliance and strengthen business with the DoD.

**CMMC is the new federal framework required to win or renew DoD contracts.** CMMC ensures organizations implement protections against cybersecurity threats to U.S. national security. CMMC protects Controlled Unclassified Information (CUI) and Federal Contract Information (FCI), reducing the risk of threats to our Nation's valuable infrastructure and our families.

**Stratus Services is Alaska's local Registered Provider Organization (RPO) ready to support you on your journey to become CMMC Certified.**

## Stratus Services can help

- Identify risks and vulnerabilities within your business and systems
- Construct a customized plan to exceed CMMC requirements
- Set goals and priorities to improve policies, procedures, and practices
- Define and implement safeguards to protect your Controlled Unclassified Information
- Assist in System Security Plan (SSP) documentation, remediation and ongoing requirements
- Support both local and remote systems

**Upgrade existing infrastructure. Meet new standards.  
Contact Stratus Services today.**
