

## **Feralloy: Hearing Conservation Testimony**

### **Challenges Faced:**

Coordinating mobile audiogram vans for testing across three shifts presented a major challenge. As an Assistant Plant Manager with a busy schedule, factors like cold and flu season, holidays, and blizzards made scheduling impractical and left me feeling frustrated and uncertain about ensuring employee safety and compliance.

### **Experience with Soundtrace:**

Soundtrace has been a reliable partner throughout our journey. They tailored our contract to suit our specific needs during sales and provided comprehensive, step-by-step guidance during onboarding, including scheduled check-ins over the initial 90 days. At every step, the Soundtrace team has been dedicated to offering clear explanations and support for both myself and our employees. Our interactions with Soundtrace's Director of Audiology, a licensed Audiologist and CAOHC instructor, have been particularly valuable. They not only clarified OSHA-related matters but also addressed our concerns, provided valuable education, and helped us implement necessary administrative changes to prioritize employee well-being.

### **Confidence in Soundtrace:**

Since partnering with Soundtrace, there has never been a moment where I've felt alone or unable to accomplish something because I honestly feel like Soundtrace is working alongside me, with me, and for me - like a true partnership should be.
