

Cleveland Brothers CAT: Hearing Conservation Testimony

Challenges Faced:

When I started at Cleveland Brothers CAT in 2022, I assumed the role of overseeing the employee Hearing Conservation Program. Like many companies, Cleveland Brothers used mobile clinics for employee audiometric testing. Managing this program across multiple locations and coordinating schedules was time-consuming, logistically challenging, costly and inefficient. It was clear we needed a better solution.

Experience with Soundtrace:

Switching to Soundtrace for our Hearing Conservation Program has been a game changer. With Soundtrace, we now have the capability to test on-demand, effectively eliminating our previous logistical challenges. Soundtrace's software with automated cloud recordkeeping has increased our efficiency and mitigated our compliance risk.

Confidence in Soundtrace:

Our experience with Soundtrace has been outstanding. Our decision to partner with them has proven to be a great investment, and given us confidence in our hearing conservation program. We view Soundtrace as a long-term partner in our commitment to hearing protection and compliance.
