

Meet the Nfinite platform

Image creation at scale,
no technical skills required

How it works

3 steps. Unlimited visuals.

With the power of CGI technology, a dedicated creative services team, and a self-serve platform, you can create and publish unlimited imagery for every channel, season, and product.

Develop immersive shopping experiences to reach audiences using the latest technology with outputs that power AR, VR, and the Metaverse.

1

Upload your product catalog for 3D modeling.

All we need are 4-6 reference photos of the product, dimensions, materials, and texture details.

2

Create, style, and manage product visuals.

Add your products to background scenes, include props, and develop channel-specific images in a few clicks.

3

Export, publish, and test the images.

Use across channels, conduct A/B tests, measure performance, and even make images customizable and shoppable on your website.

What you can create

Product imagery without limits

Packshot creator

Create packshots, close-ups, and 360° spins that enable shoppers to see your products up close and from every angle.

Scene creator

Add your product images to backgrounds with thousands of prebuilt templates and props to create cohesive scenes that speak to shoppers, or create your own scenes that reflect your brand aesthetic.
