## Course Description:

This course will empower the dental provider, whether you are an orthodontist, pediatric dentist, prosthodontist/restorative dentist, maxillofacial radiologist, TMD/pain specialist or general dentist to effectively leverage the use of Cone Beam Computed Tomography (CBCT) technology to feel very comfortable with DICOM data management & interpretation, efficient work flow, medical/dental insurance coding, airway focused treatment planning to maximize case acceptance and reimbursement with a science-based, validated approach.

## Course Objectives:

- To understand the relevant airway cuts/views for treatment planning and insurance reimbursement
- To learn proper airway patient positioning and image field standardization
- To learn about the anthropologic radiologic standard for long-term intervention stability.
- Learn to accurately treatment plan airway structural risk factors from the CBCT.
- Learn to navigate through the full volume CBCT with video tutorials provided to participants with step-by-step instructions
- Clinical integration of the photographic gallery as a phenotype assessment with the CBCT views
- Relevant airway focused telescopic surgical treatment planning with a cutting-edge. science-based approach.
- Learn to assess the cervical spine relative to posture compensations and TMD
- Learn proper medical/dental insurance codes for relevant airway views
- Learn how to create the airway report with the key radiologic and photographic gallery views
