Terminal Smartpeak **P2000L**

(Including Toll demo app)

User manual.

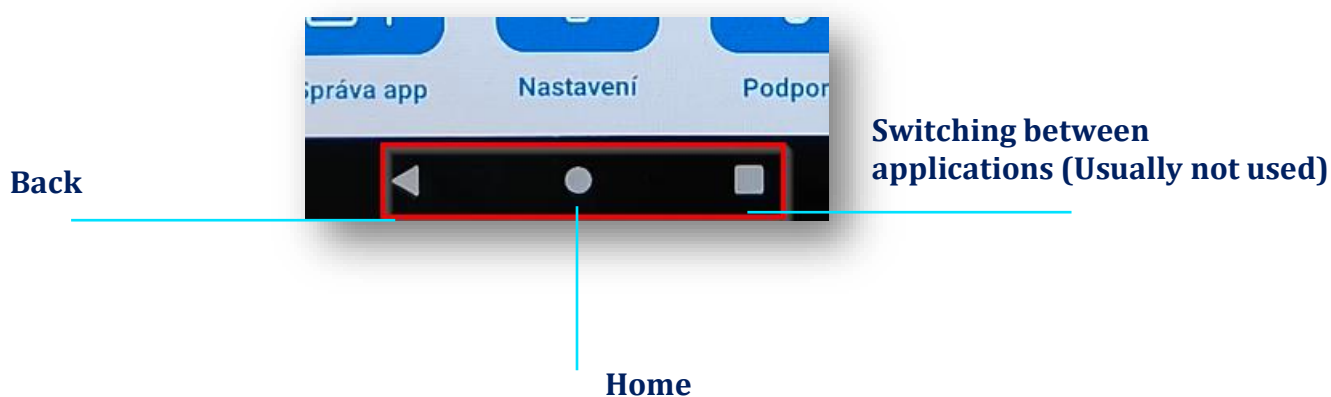

Table of Contents

1. Controls, internet connection
2. Setting the unit (totem) price
3. Authorization of Eurowag cards for fuel
4. Toll demo app
5. Other features
6. Troubleshooting

1. Controls

It is done exclusively via the touchscreen. The terminal runs on Android, so the control is very similar to that of a mobile phone. At the bottom of the display, we find 3 familiar symbols:

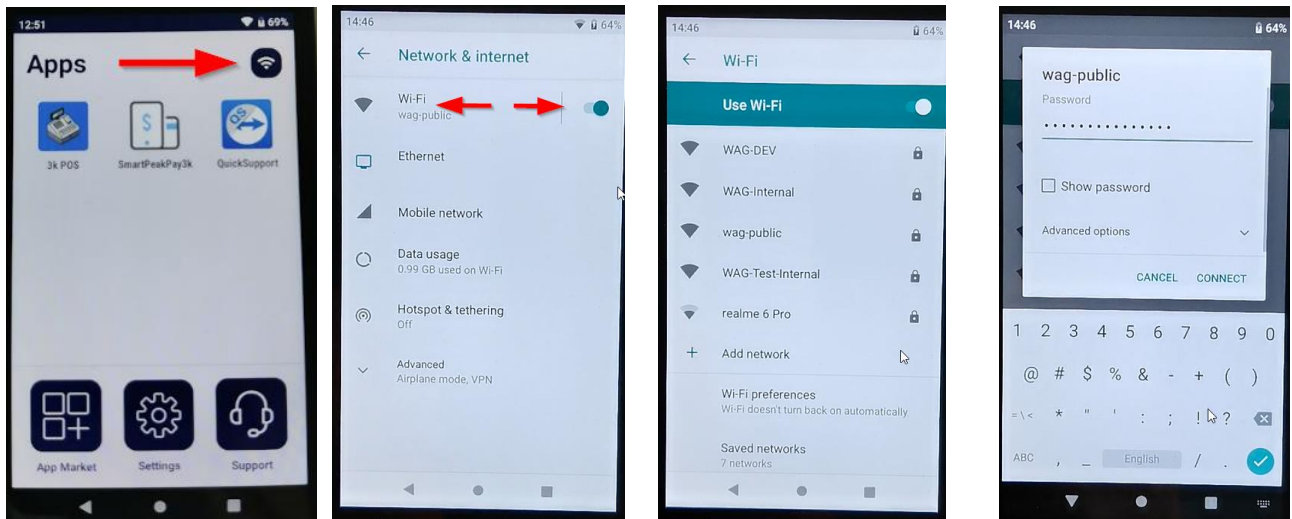

Connecting to Internet

Terminals have connection to mobile internet via inserted SIM cards.

If needed, you can use also use Wi-Fi:

Wi-fi setup procedure (only 2.4 GHz networks are supported):

Click on the icon of connection in the top right corner, set “Wi-fi” to on and press the WIFI line to enter the settings, select your network and enter your password.

Connection is indicated

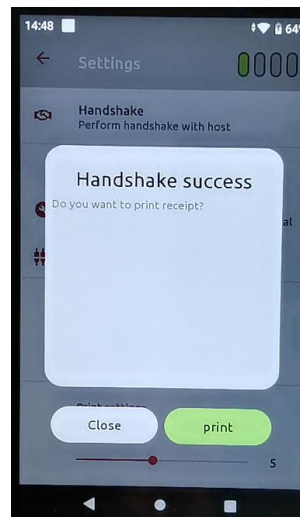

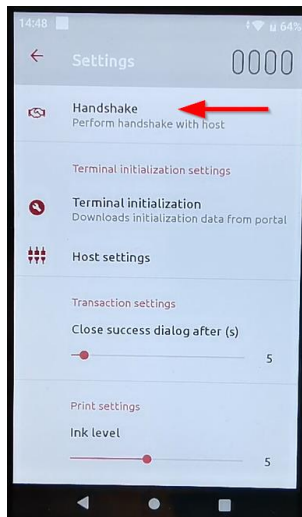

icon on the top right
in the status bar.

Connectivity can be verified via the **SmartPeakPay3k app**.

Launch the app, open the menu, select Settings, and select “Handshake”. If Handshake is unsuccessful, please contact your IT specialist to check correct setting of internet connection.

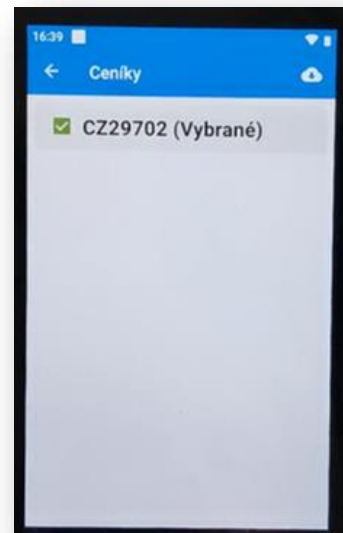

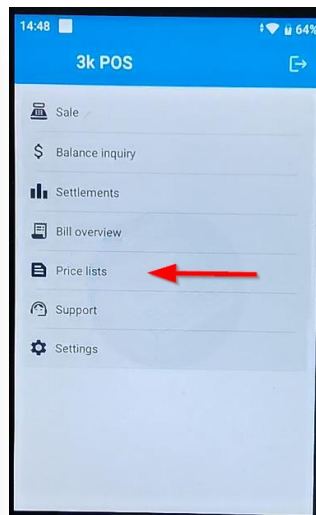

2. Setting the unit (totem) price (fuel products only)

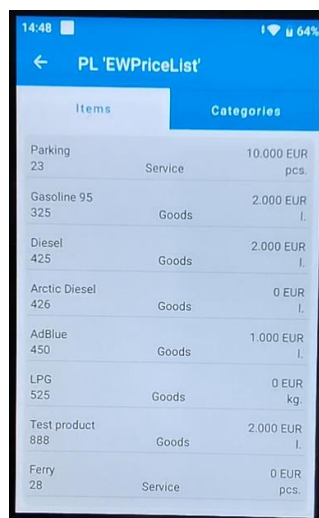

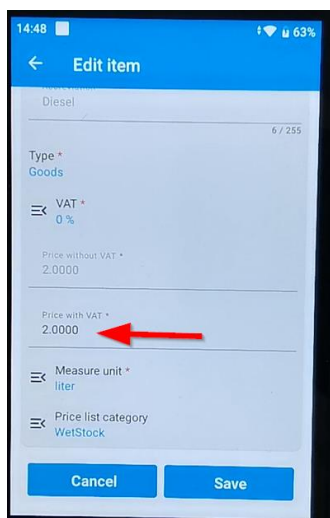

We set this to avoid typos during the authorization itself. The authorization process checks whether the entered purchase price corresponds to the unit price.

Launch the “3K POS app”, select “Price lists”, if you can't find a price list, download it via the cloud icon with an arrow.

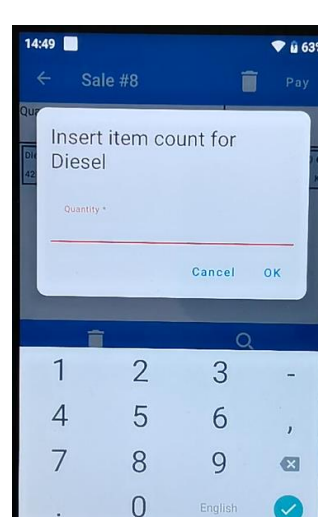

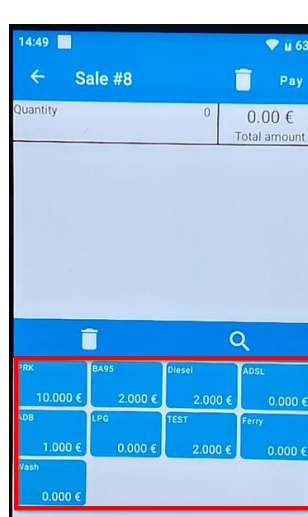

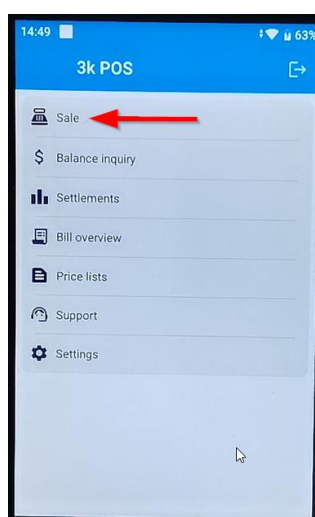

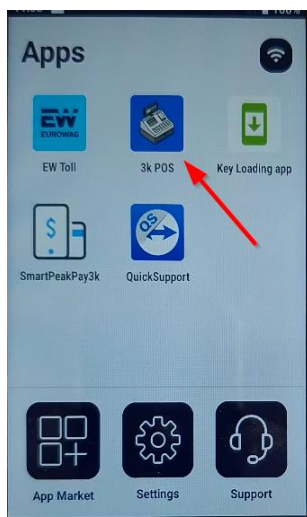

..

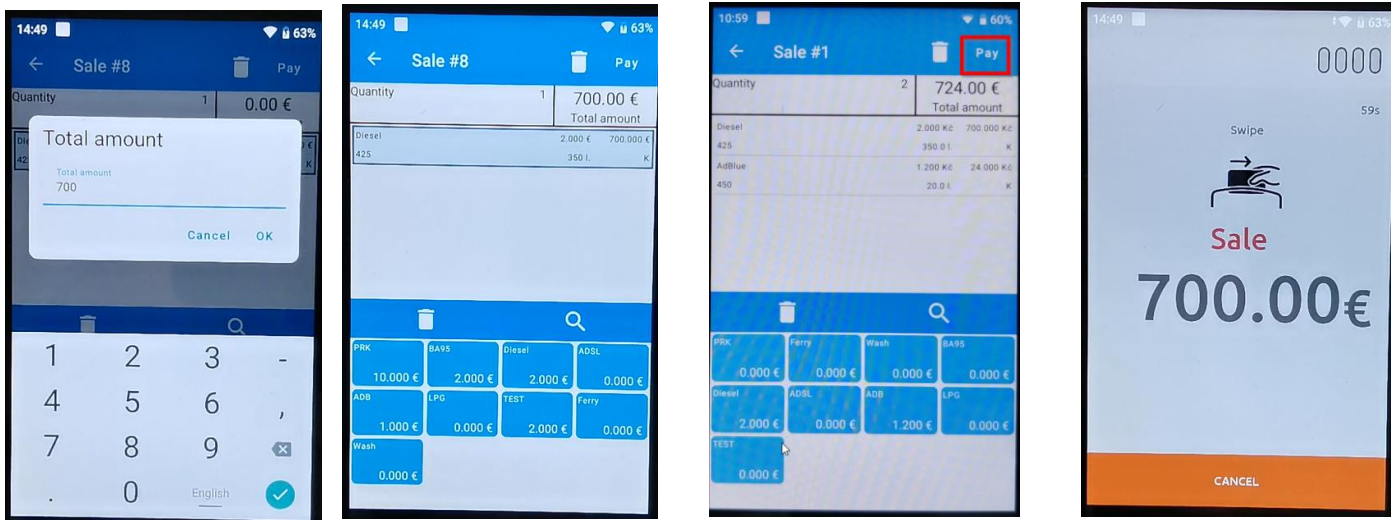

Select the price list, select a specific product, scroll down, set the "Price with VAT" value according to the current totem price and save. Please set up other products in the same way.

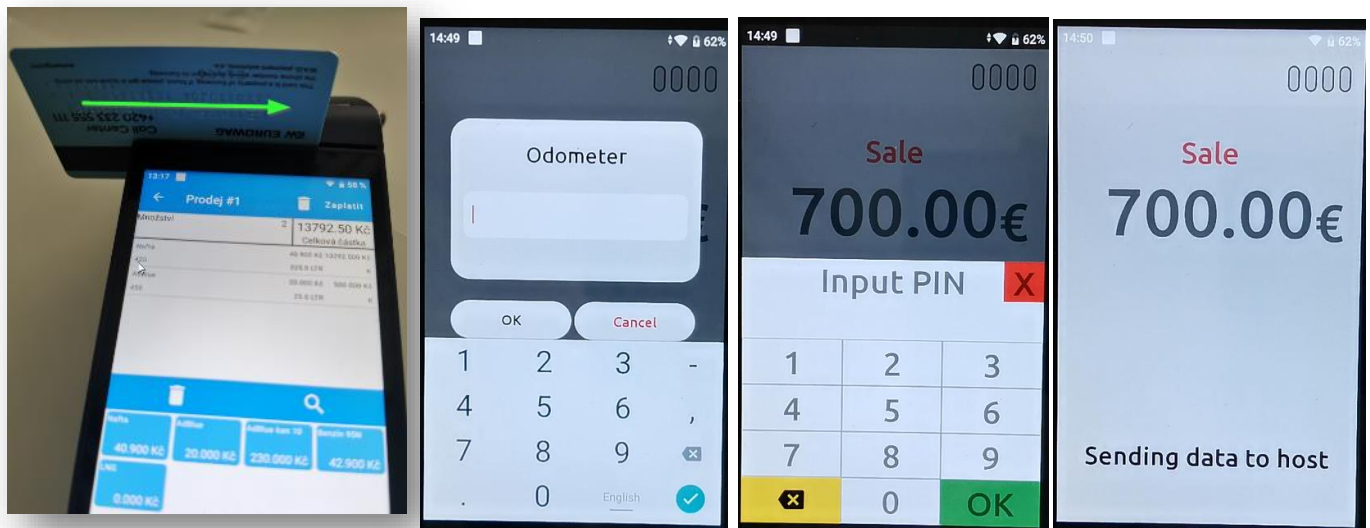

3. Authorisation of EW cards - sale of fuel

- Start the "3k POS" application
- select sale
- select a product from the menu at the bottom of the screen
- Enter the quantity
- enter the total amount for the product (amount must correspond to unit price of the product)
- if necessary, enter other products in the same way
- press "Pay"

- swipe the card (only provided cards with LPN “UAT nnnn” will work)
- enter the odometer value and PIN
- online authorization towards testing environment is performed

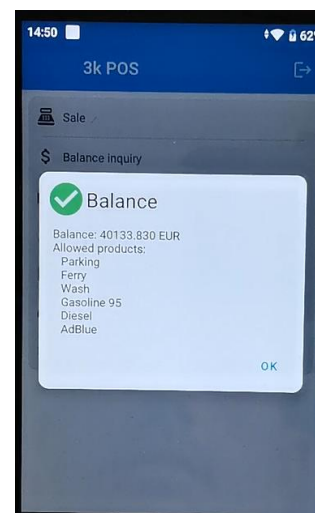

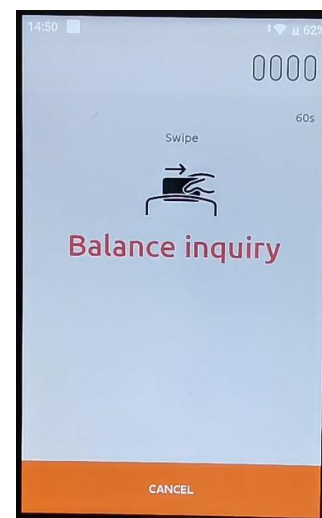

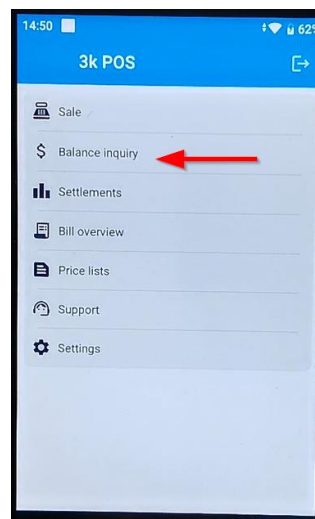

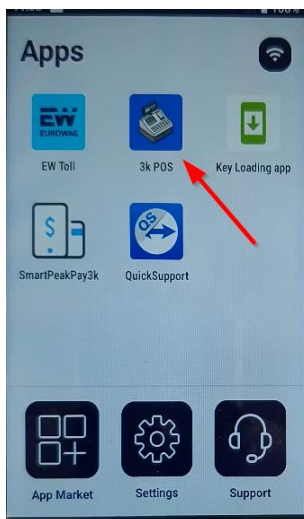

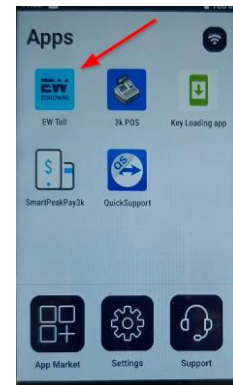

If the authorization is successful, the terminal displays a confirmation on the screen and prints a receipt for the driver. The operator can then print another receipt for himself.

Balance enquiry

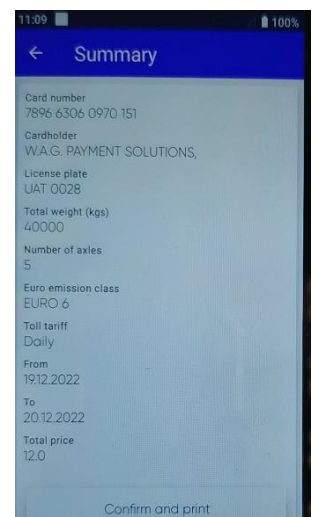

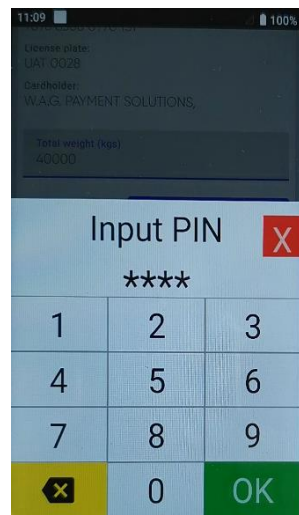

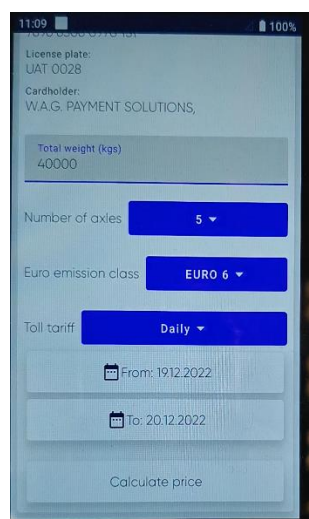

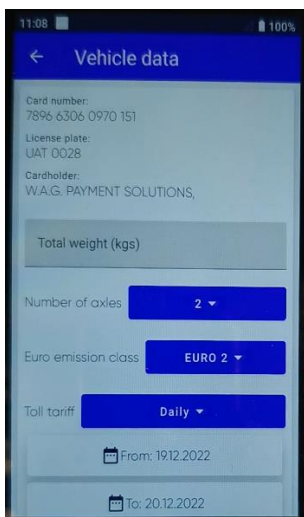

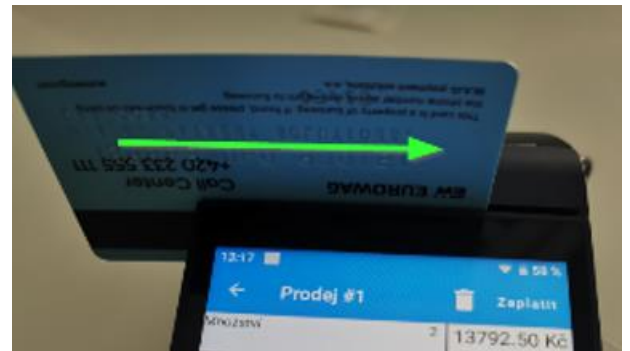

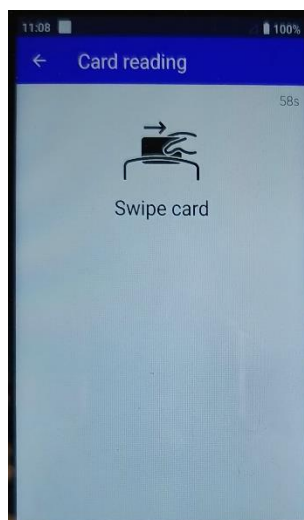

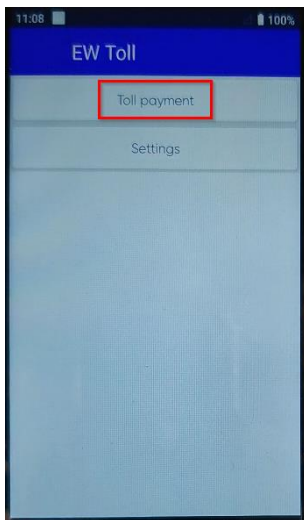

The driver can check the card's free limit before the actual fuel withdrawal.

- Start the 3k POS application
- select "Balance inquiry"
- swipe the card
- the terminal displays the card's free limit and allowed products

4. Toll demo app

- Select “EW Toll” app.
- Select Toll payment (Settings has no function)
- Swipe the card (**any EW card will work**)
- Input vehicle data
- Select time period
- Select calculate price
- Input PIN (demo app = any numbers will be accepted)
- Terminal shows summary
- Select confirm and print receipt

5. Other features of the 3k POS application

Basic menu:

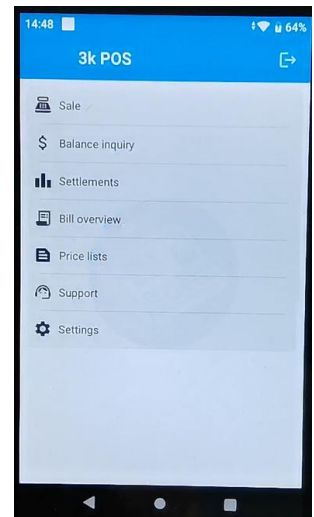

"Settlement" - (formerly known as "Batch Closing") then select "Daily Settlement" and the terminal prints a summary of the collections made since the previous closing date. It is recommended to be done at the end of working hours every day or once a week.

"Bill overview" - displays sales made since the last settlement (batch closing).

"Pricelists" - download pricelist, set unit prices.

"Support" - here you can find information about the device, contact to the help line and more.

"Settings" - change the language, etc.

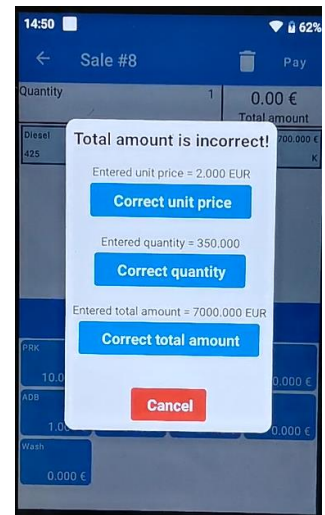

6. Troubleshooting - Terminal error messages

Wrong quantity or price in fuel authorization

If any of the values are entered incorrectly, the terminal will indicate this on the display and the incorrect value must be corrected.

You can then continue by entering the next product or proceed to payment.

The SmartPeak 2000L terminal is the property of the company:

W.A.G. payment solutions, a.s.
