

Size Range

Nominal Size ø	Space needed between joists/rafters (mm)	Features
350	345	Suitable for very small rooms – up to 2m x 2m for flexible tube system and 3m x 3m for rigid tube system. Fits between most conventional rafters/joists – eliminating the need for trimming work.
450	460	Suitable for rooms up to 3.5m x 3.5m for flexible tube system and 4.5m x 4.5m for rigid tube system.
550	540	Suitable for rooms up to 5m x 5m for flexible tube system and 6m x 6m for rigid tube system.

For larger areas, use multiple units of optimum permutation. Transmitted light varies due to position on roof and adjacent trees or buildings.
