Fluted

We take our premium upholstery vinyl and apply a fluted finish, using a foam insert to provide a luxury feel and finish to the product. Suitable for all upholstery applications and available in a selection of our more popular colours, although any colour can be fluted subject to a minimum quantity. Measurement between flutes is 2".

Vinyl Cleaning

Prefixx Care & Cleaning

With the factory-applied PreFixx protective finish, it is possible to easily remove more stains than ever before. However, some stains can become permanent if not removed quickly. We recommend cleaning as soon as possible after a stain is discovered.

Weekly Cleaning

Each week, wipe PreFixx protected Nautolex surfaces with a soft damp cloth and towel dry. In very rainy weather, cover or remove cushions since seams can trap and absorb moisture. Cushions should be stored in a dry, well-ventilated place.

Special Cleaning Instructions

Because these vinyls are protected with PreFixx, many stains that would permanently mark other marine vinyls can be removed by following a three-step process (refer to cleaning chart opposite):

1. Begin by using a mild soap and water solution and, if necessary, a soft-bristle brush.
2. Any stains still remaining should be immediately cleaned with isopropyl (rubbing) alcohol.
3. If a residual stain remains after Step 2, use fingernail polish remover containing acetone. If the stain has not become permanent, it should be removed after rubbing the spot 5 or 6 times. Do not continue beyond 6 rubs, because rubbing could possibly damage the finish.

After using mild soap, alcohol or fingernail polish remover, rinse off any remaining residue with a damp cloth and towel dry.

Do Not Use

Abrasive powders, steel wool, industrial strength or solvent cleaners, vinyl "conditioners" or "protectants". Undiluted bleach and lacquer solvents can dull or damage the vinyl. If in doubt about a detergent or cleaner, test a patch in an inconspicuous place before applying in a larger area.

CAUTION

Suntan lotion and insect repellents can cause rapid staining and deterioration of the vinyl surface. Remove these products immediately after contact; wash the area with a mild soap solution, rinse with clean, warm water, then towel dry.

Cleaning Solutions

Underlining

A material designed especially for the bottom of cushions. Manufactured from a woven polyester with a PVC coating it is designed to provide breathability to the cushion and allow moisture to escape. The underlining is mould and mildew resistant, and is perfect to use when covering cushions in a non-perforated or breathable material.

- Seat and cushion underlining
- Breathes and releases moisture. Resists rot and mildew
- 140cm wide
- Sold by the metre
