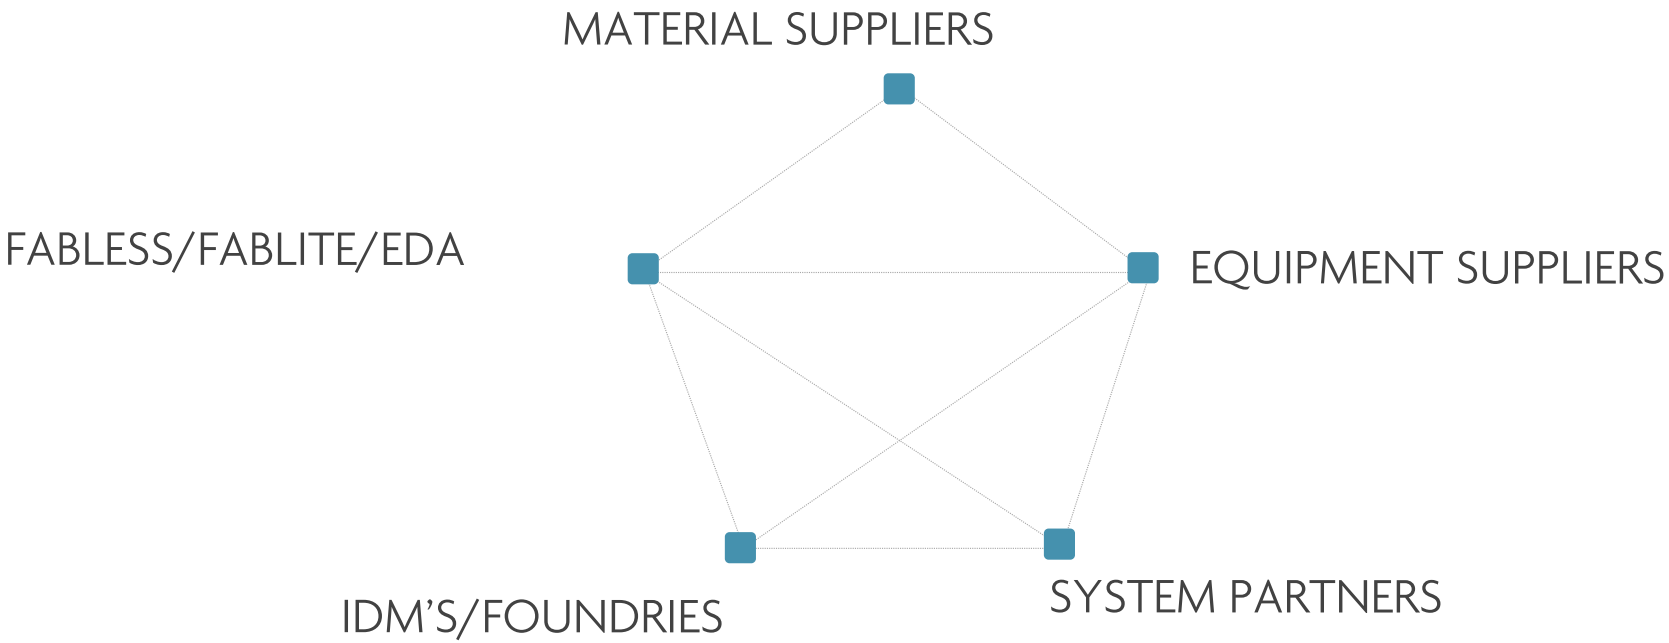
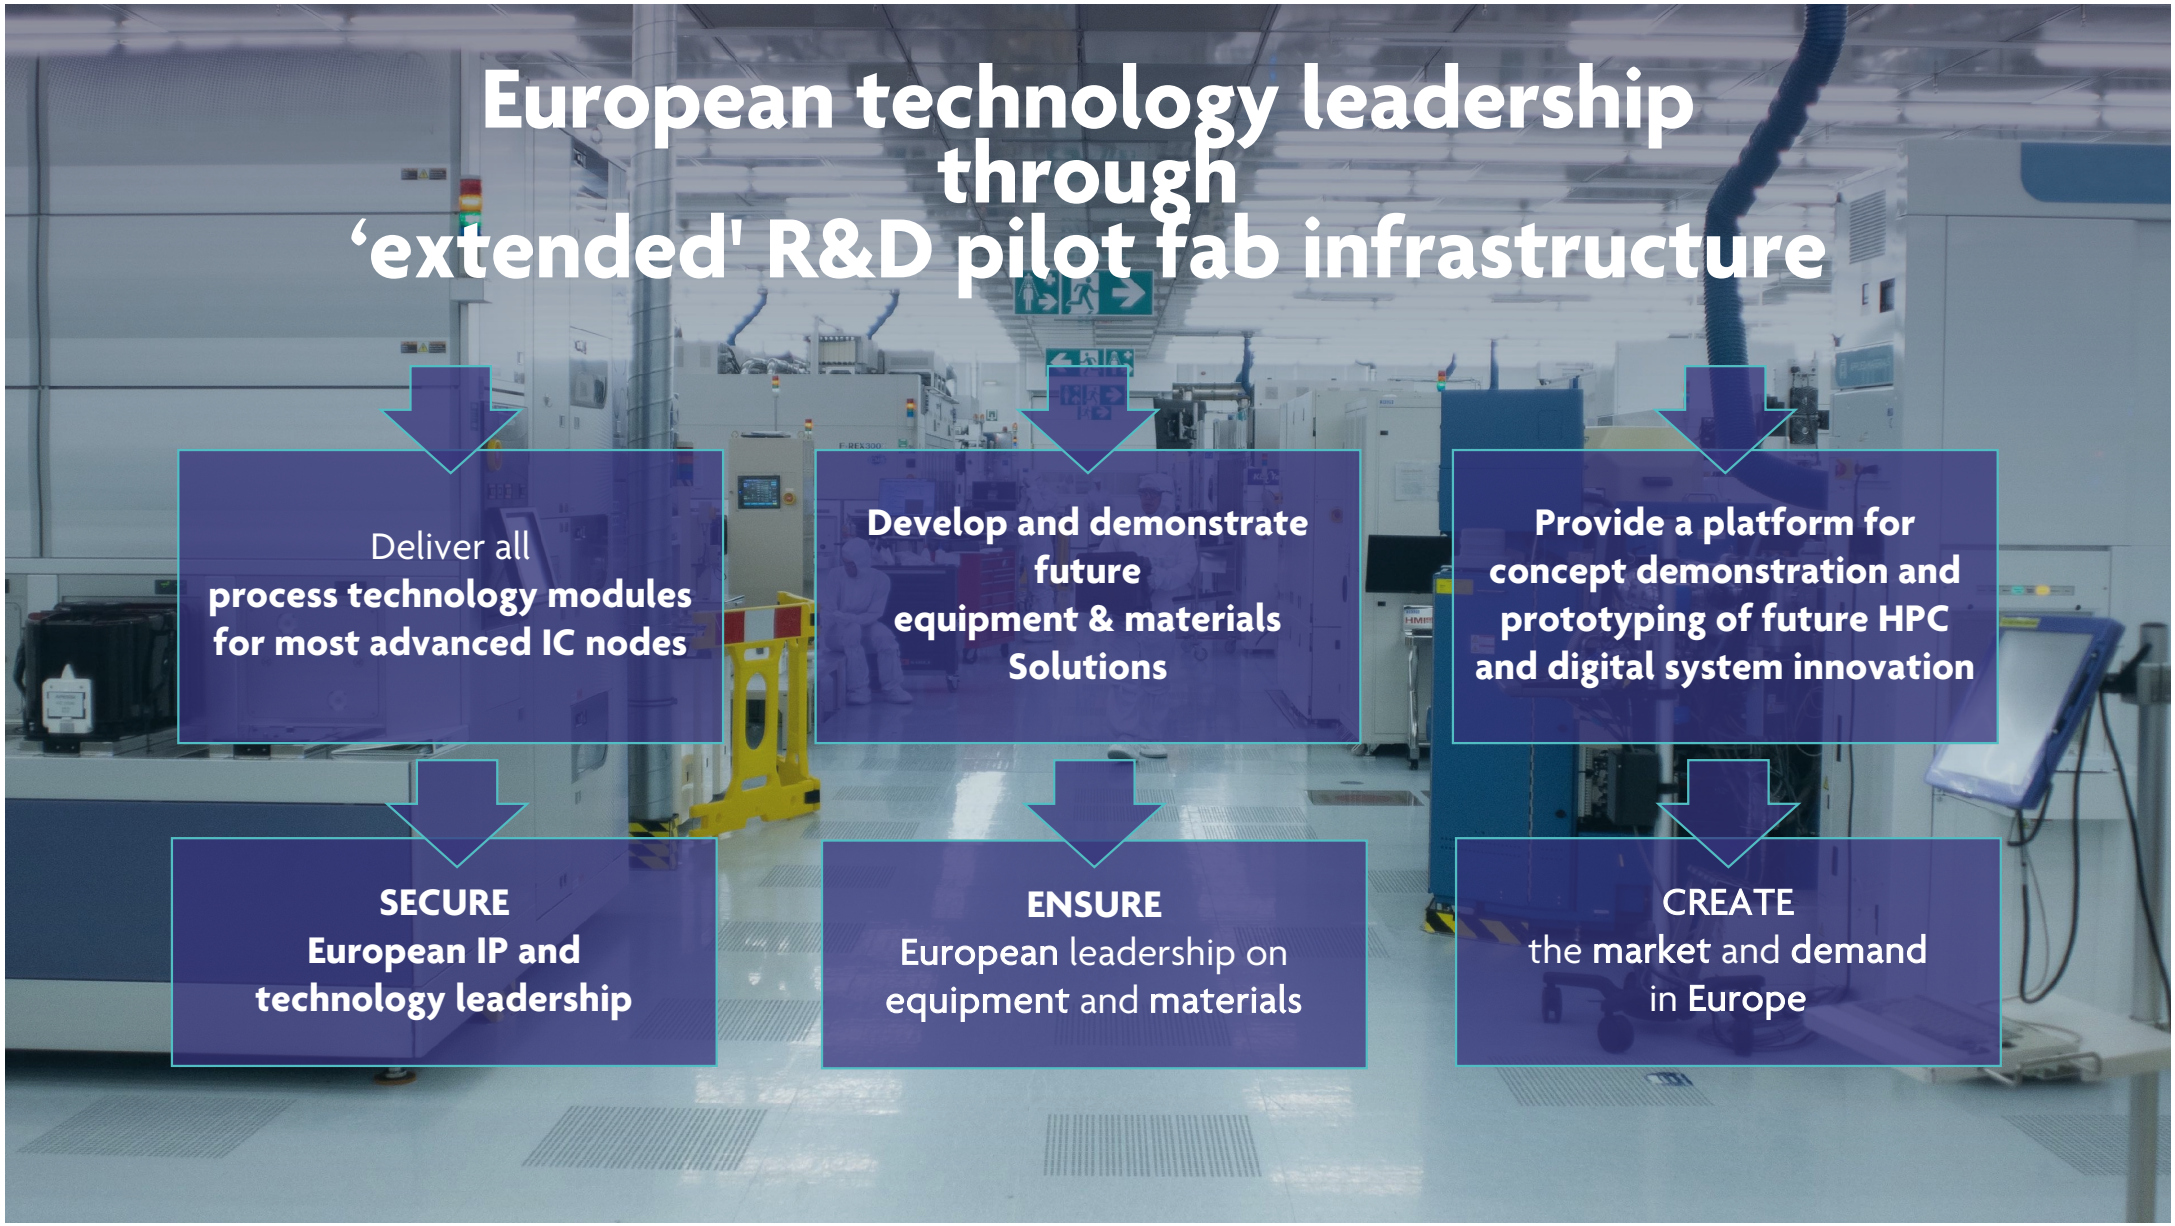
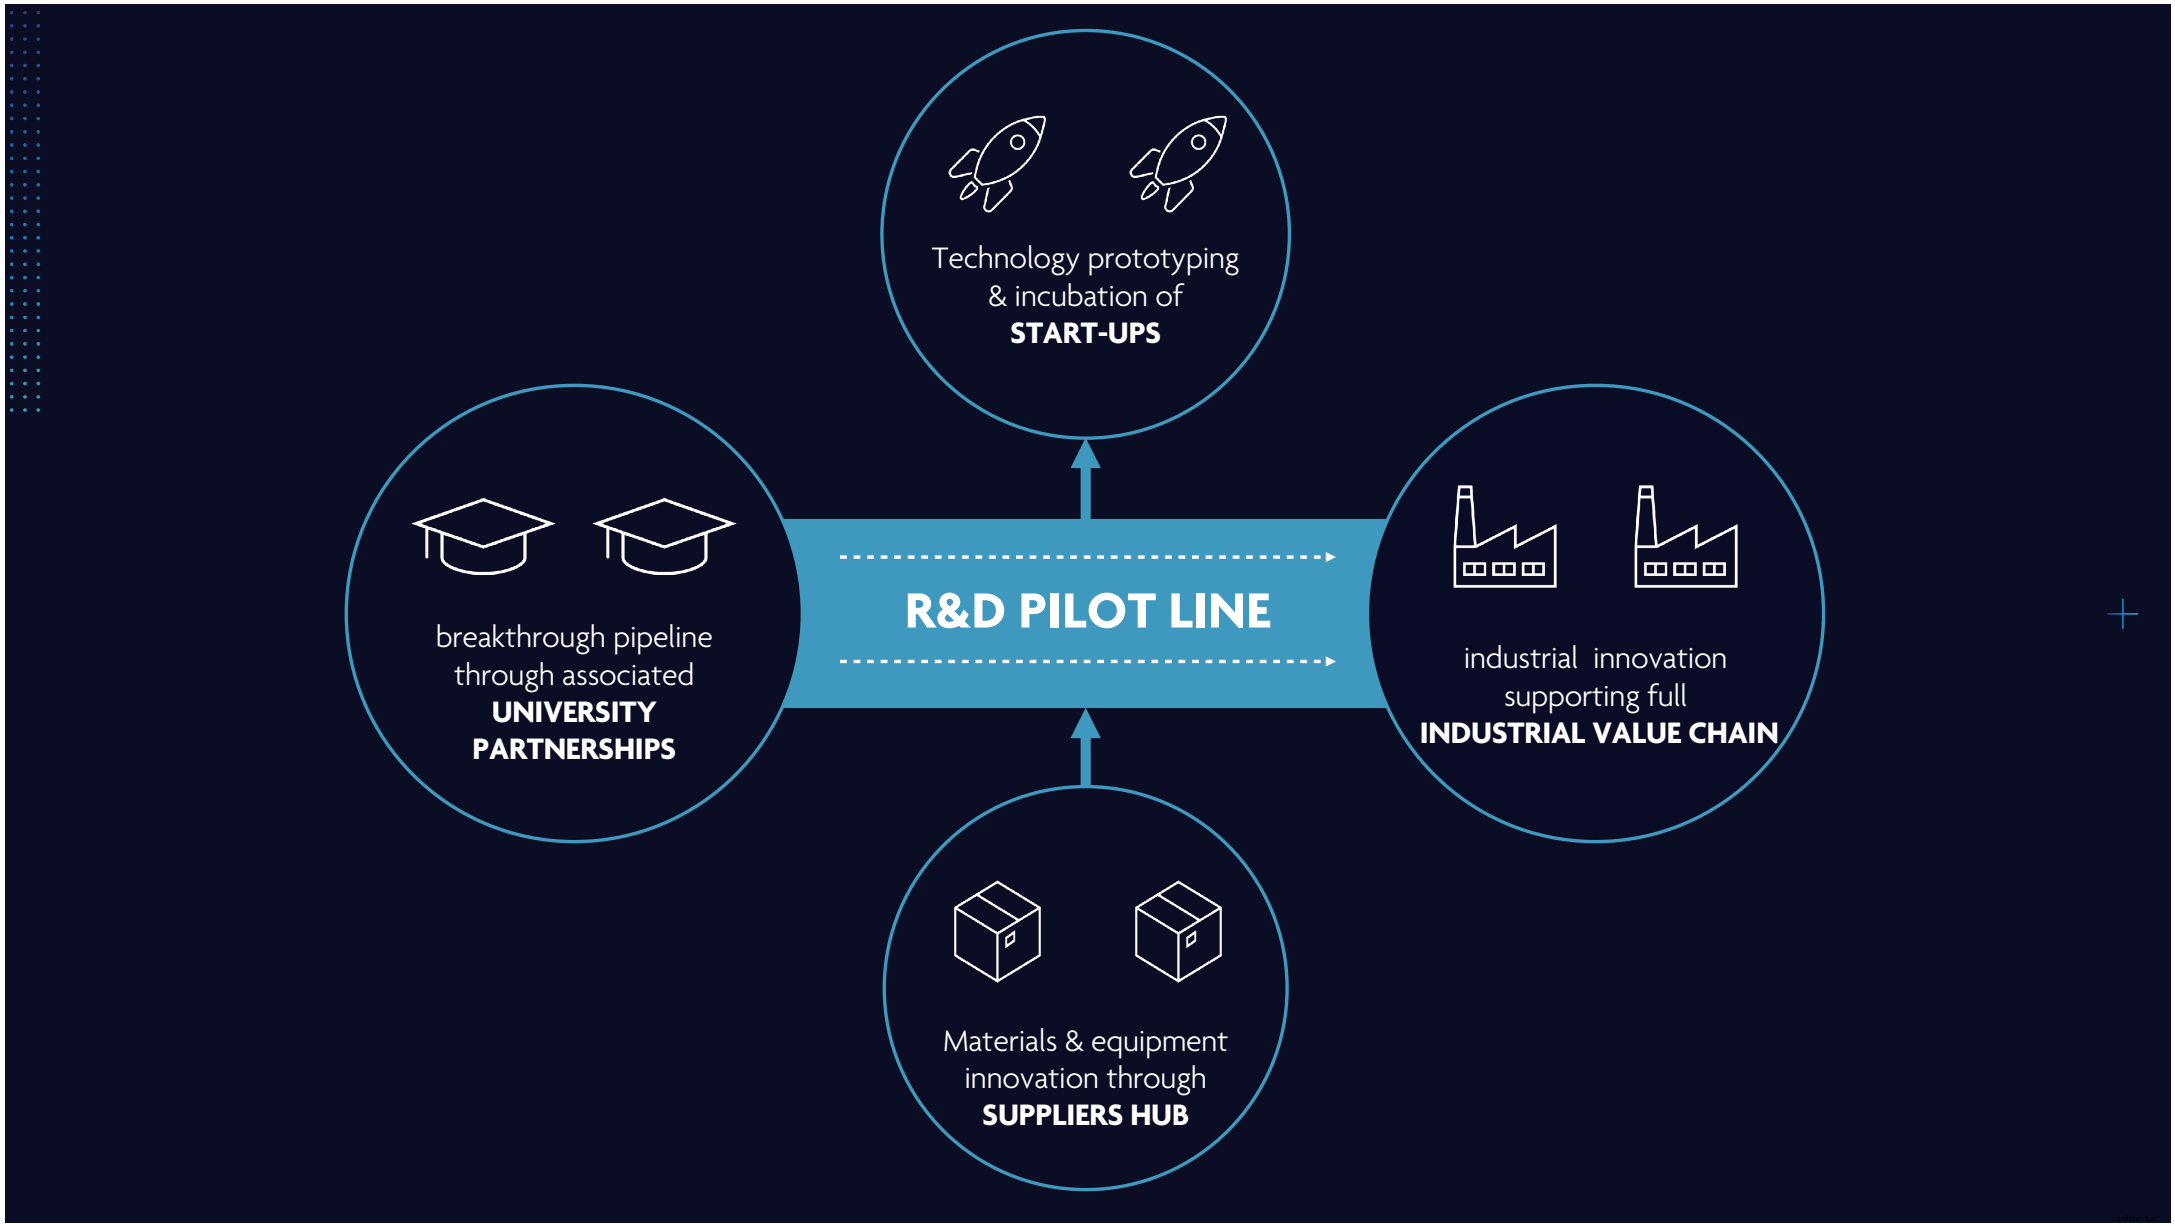
Networked innovation model



confidential



European technology leadership through 'extended' R&D pilot fab infrastructure
Deliver all process technology modules for most advanced IC nodes
Develop and demonstrate future equipment & materials Solutions
Provide a platform for concept demonstration and prototyping of future HPC and digital system innovation
SECURE European IP and technology leadership
ENSURE European leadership on equipment and materials
CREATE the market and demand in Europe



Technology prototyping
& incubation of
START-UPS
breakthrough pipeline
through associated
UNIVERSITY
PARTNERSHIPS
R&D PILOT LINE
industrial innovation
supporting full
INDUSTRIAL VALUE CHAIN
Materials & equipment
innovation through
SUPPLIERS HUB

embracing a better life
