Investing involves risk. Principal loss is possible. The Fund is subject to liquidity risk (the risk that an investment may be difficult to purchase, value, and sell particularly during adverse market conditions, because there is a limited market for the investment, or there are restrictions on resale) and credit risk (the risk an issuer may be unable or unwilling to meet its financial obligations, risking default). High-yield/high-risk bonds ("junk bonds") and floating-rate loans (usually rated below investment grade) have greater risk of default than higher-rated securities/higher-quality bonds that may have a lower yield. The Fund is also subject to foreign-markets risk.

Investors should consider a fund's investment goal, risk, charges and expenses carefully before investing. The prospectus contains this and other information about the fund and can be obtained at www.aristotlefunds.com. It should be read carefully before investing.
