Our Story

Orient Group was founded in 1991 by a group of experienced professionals with a vision to help businesses in their Digital Transformation journey

Headquartered in Mumbai

ISO 9001 : 2015, ISO 22301 : 2012, ISO 27001 : 2018

CMMI Level 3 Certified

1200+ Employees

2500+ Happy Customers served

Our **Mission** is to be the partner of choice to the growing needs of customers by providing Business Objectives solutions and delivering professional services.

Our **Vision** is to be a trusted global IT solution and services partner for our esteemed customers and principals.

Our Purpose

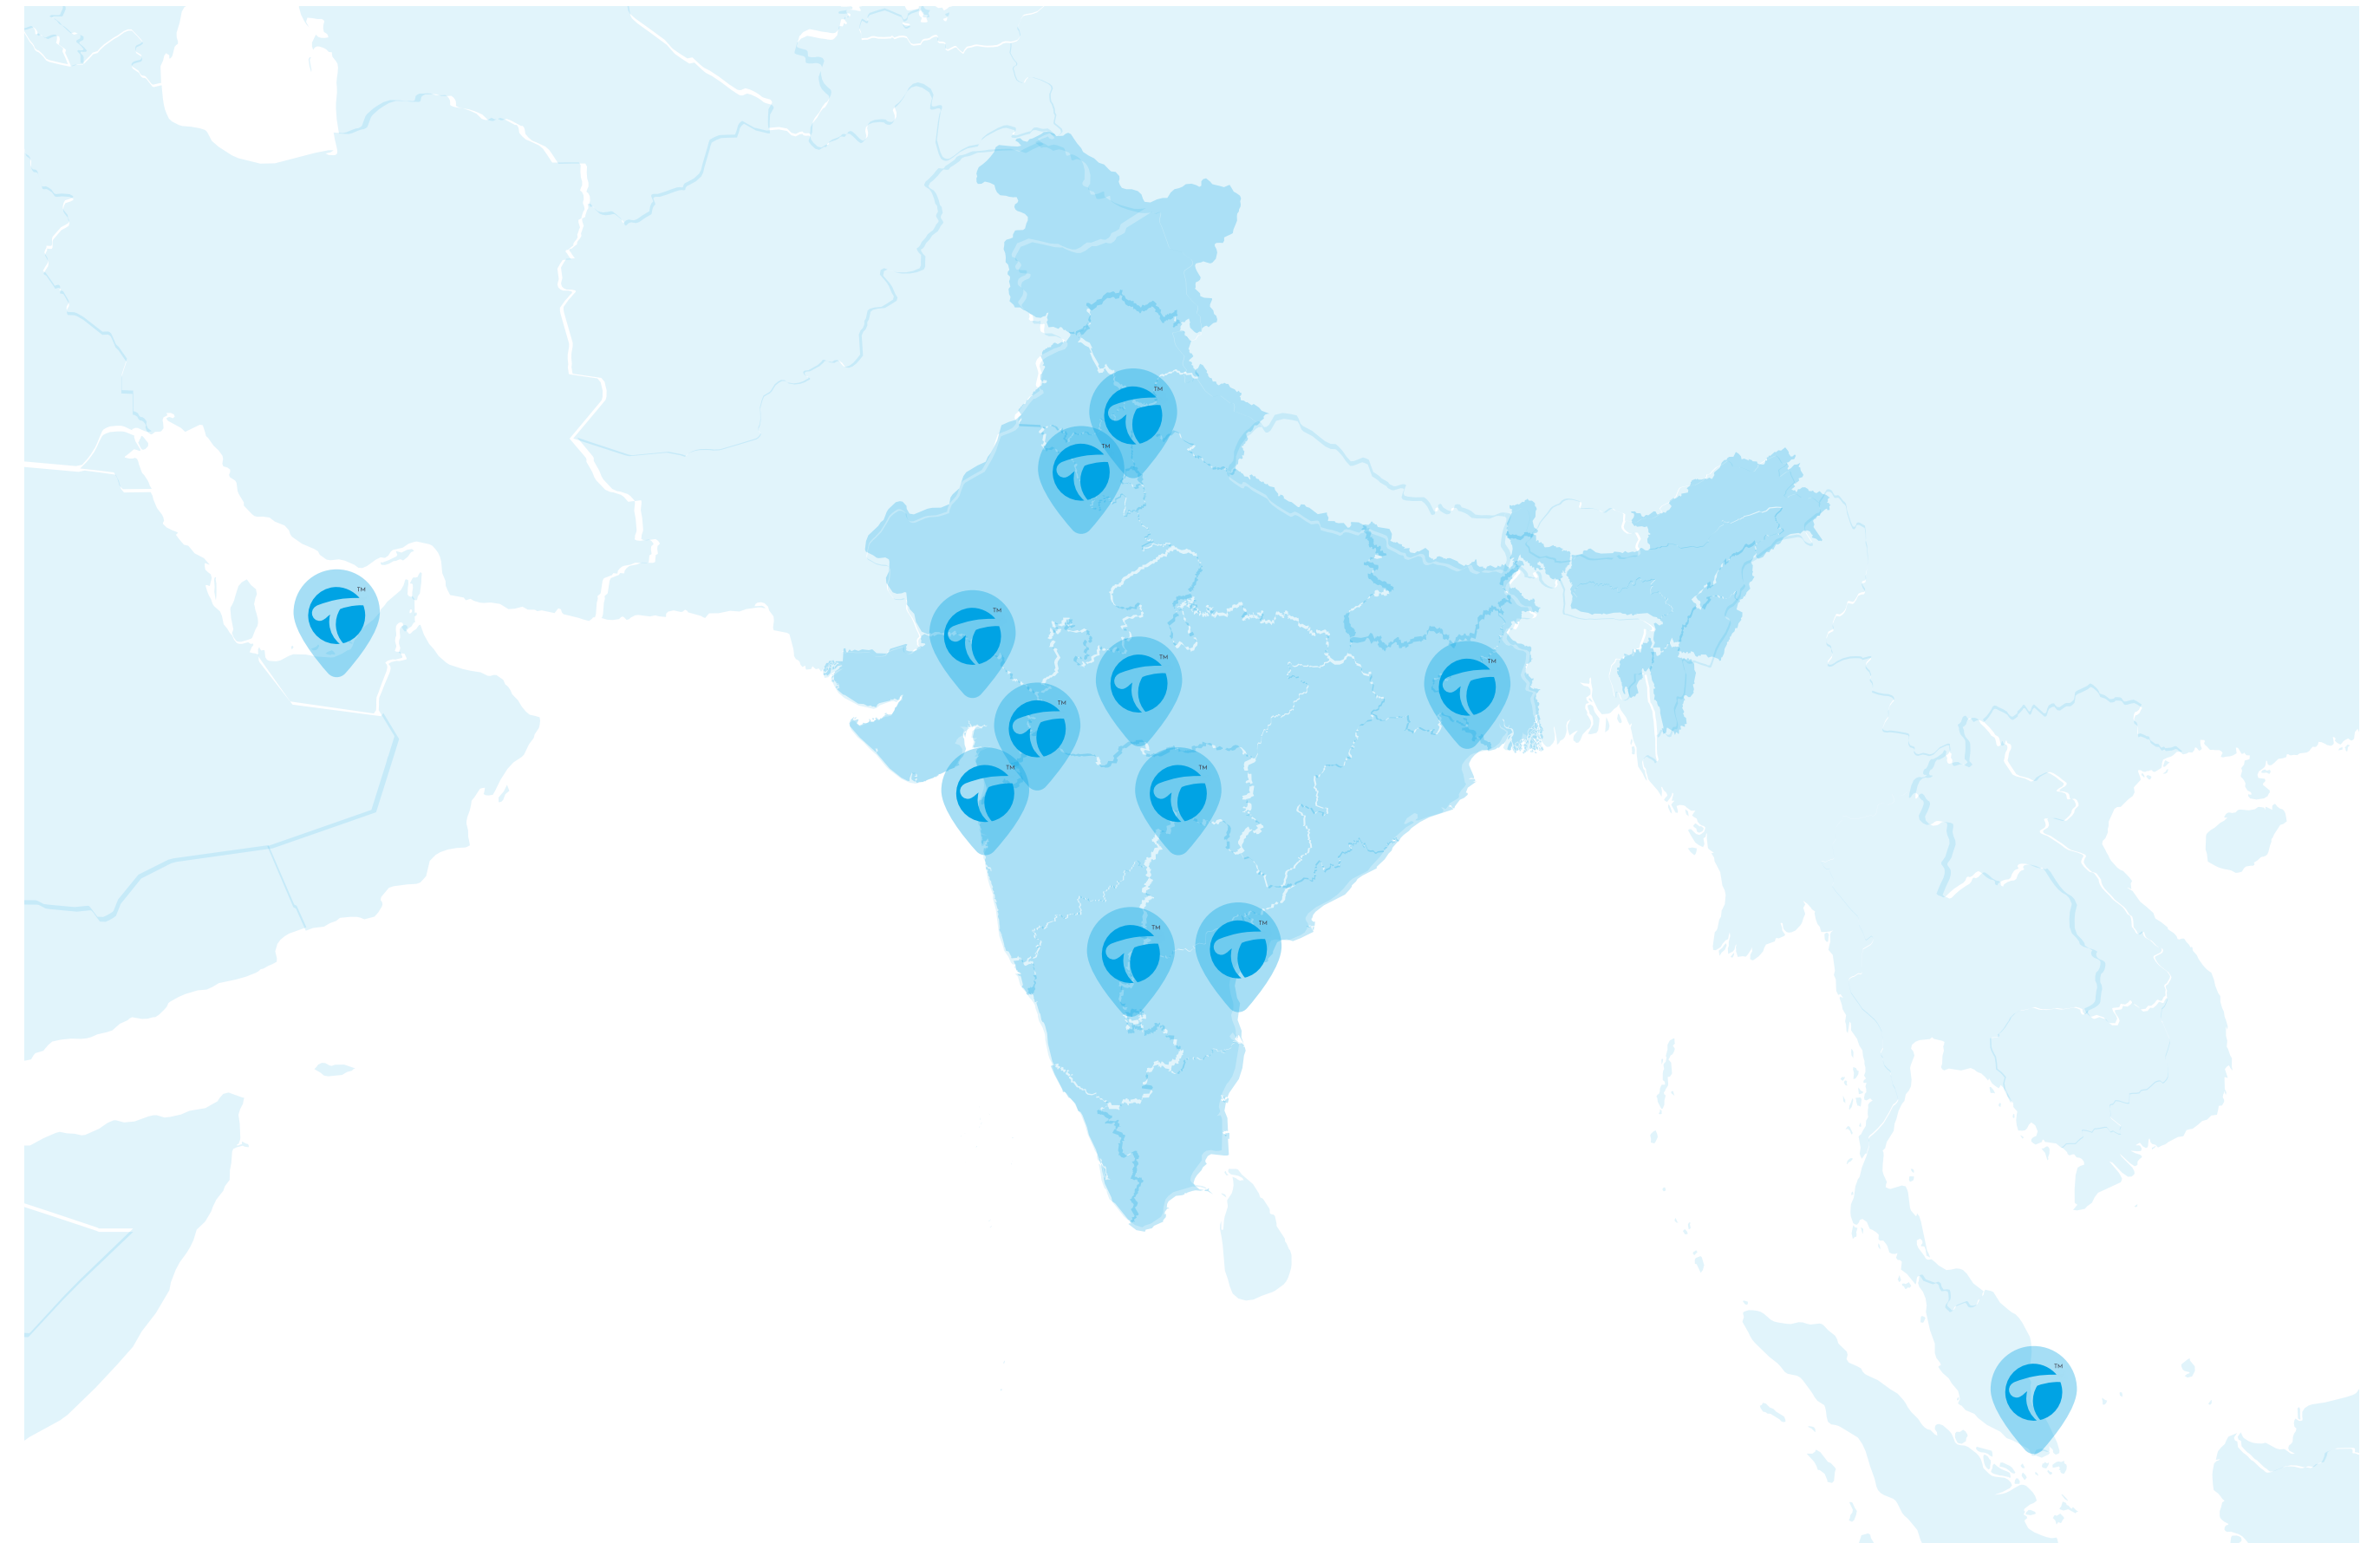

Our Presence

PAN India presence with offices
across 10 cities in India:

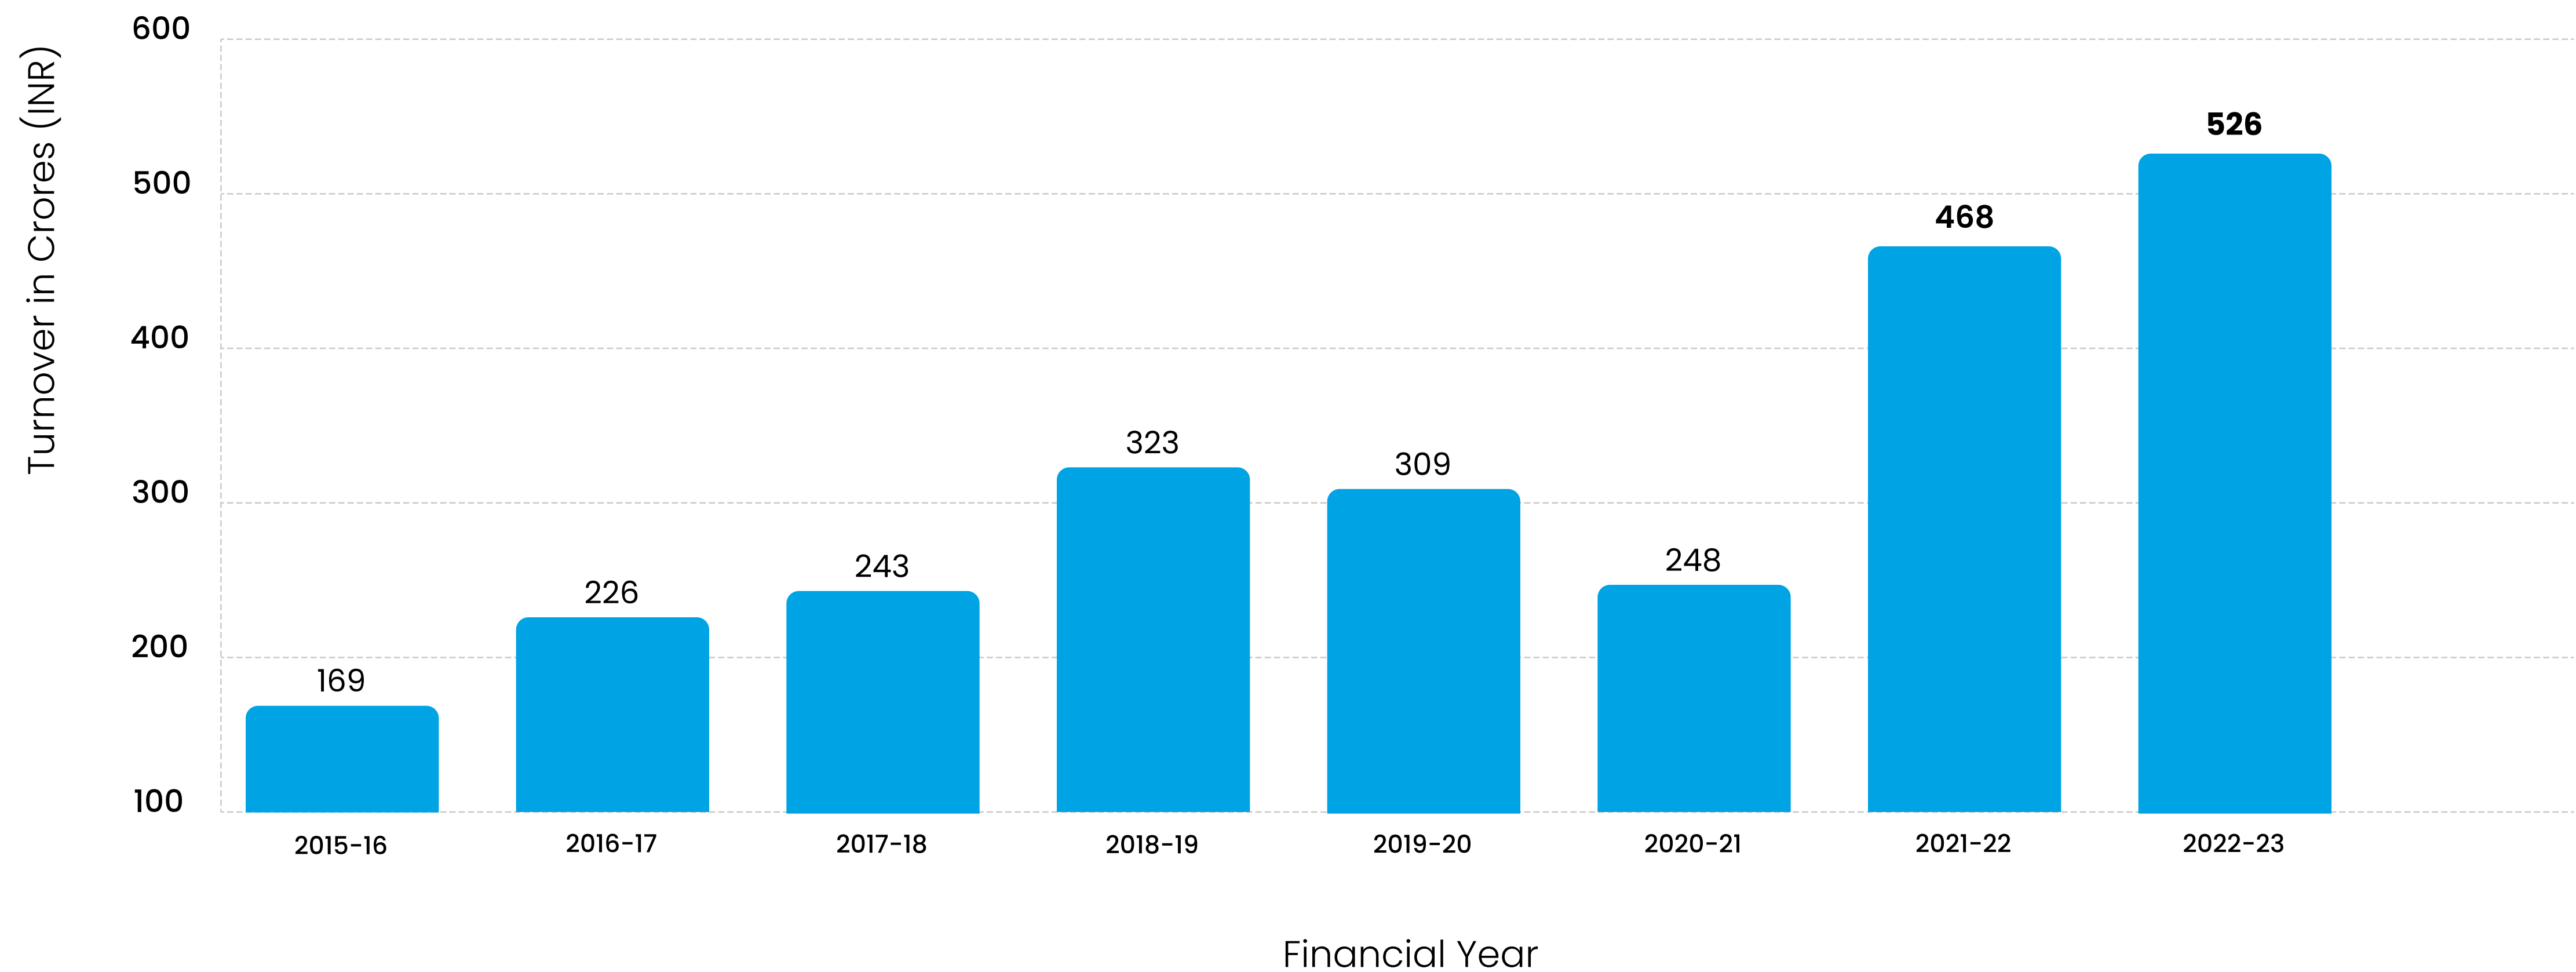

- Ahmedabad
- Bangalore
- Chennai
- Delhi
- Gurgaon
- Hyderabad
- Indore
- Kolkata
- Mumbai
- Pune

And a Global presence in:

- UAE
- Singapore

Our Growth

End User Computing

- Desktop Management
- Device As A Service
- End-User Support
- Mobile Device Management
- Zero Touch Deployment

IT INFRASTRUCTURE MANAGEMENT

Data Centre Solutions

- Active & Passive Networking
- Backup & DR
- Hyperconverged Infrastructure
- Collaboration
- Security
- Virtualization

Tech Support

- Facility Management Services
- Managed Services
- Multi-Vendor Support
- NOC/SOC
- Renewals

Cloud Services

- Analytics
- Blockchain
- Cost Management
- Customer Engagement Services
- Database
- DevOps
- Internet Of Things
- Lift & Shift
- Migration
- Networking & Content Delivery
- Optimisation
- Security, Identity & Compliance
- Virtual End User Computing

CLOUD AND DEVOPS MANAGEMENT

Data Management

- Application Development
- Application Support
- Business Analytics
- Data Warehousing
- Robotic Process Automation

End User Computing

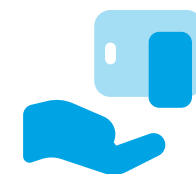

The Cornerstone of Modern Workplace productivity

Capabilities

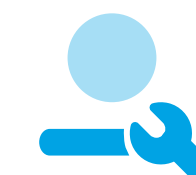

Desktop Management

Services to manage the desktop computing environment for an organization to ensure that desktop computers, laptops, and other devices are managed effectively, efficiently, and securely

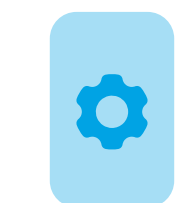

Device As A Service

Cost-effective and scalable hardware procurement, management, and maintenance, while also providing access to the latest technology

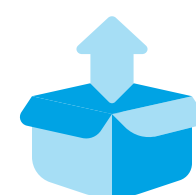

End-User Support

Service that ensure end-users can use technology efficiently and effectively, while minimizing downtime and disruptions to their work

Mobile Device Management

Provide with a centralised platform for managing mobile devices, ensuring security, and enhancing productivity

Zero Touch Deployment

Streamlining and automating the process of deploying new hardware devices, saving time, reducing errors, and improving efficiency. By providing pre-configured devices, automated enrolment, and remote management capabilities, this helps organizations focus on their core business objectives, rather than spending time and resources on manual deployment tasks

Data Centre Solutions

Innovative, reliable, and customised Data Centre Solutions

Capabilities

Active & Passive Networking

Incorporating advanced networking technologies and intelligent management features, empowering seamless communication, high-performance connectivity, and efficient traffic handling for your mission-critical applications and dynamic workloads.

Backup & Disaster Recovery

Provide reliable yet cost-effective back up and data recovery solutions.

Collaboration

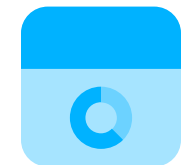

Seamless communication, shared resources, and efficient collaboration, allowing your teams to focus on innovation and growth while leaving the server management to us.

Data Centre Solutions

Innovative, reliable, and customised Data Centre Solutions

Capabilities

Hyperconverged Infrastructure

Comprehensive range of compute and storage solutions that include high-performance servers, scalable storage systems, cutting-edge Hyperconverged Infrastructure (HCI), reliable backup solutions, flexible virtualisation technologies, and innovative thin client solutions.

Security

Advanced physical and digital security measures, robust access controls, and real-time monitoring, ensuring the highest level of data integrity and confidentiality for your critical business operations.

Virtualization

Pioneer in virtualization arena to take care of server, storage, network, desktop and application virtualization.

Tech Support

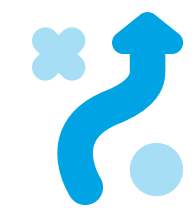

Tech Services tailored to meet your specific IT needs

Capabilities

Facility Management Services

IT Infrastructure Management through on-site & remotely deployed resources with the help of SLAs and NOC.

Managed Services

Provide various managed services like Backup as a service, Data Recovery as a service, SD-WAN as a service

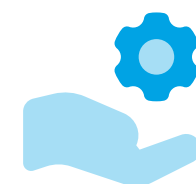

Multi-Vendor Support

Catering and Maintaining various services through multiple vendors and directly on a yearly contract basis.

NOC/SOC

24/7 proactive remote network management and security services, safeguarding the organization's operations and maintaining a robust and secure network environment.

Renewals

We facilitate the process of renewing licenses for our client on a yearly basis. This includes ensuring that all necessary documentation is in order, submitting applications on time, and handling any issues that may arise during the renewal process.

Cloud Services

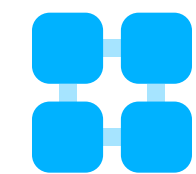

Accelerate your digital transformation journey

Capabilities

Analytics

BI on Quicksight, Managed Data warehouse PB scale

Blockchain

Managed Blockchain with Ethurium , Keys Management for data protection

Cost Management

Finops for Cost Optimisation , RI management, Programs

Customer Engagement Services

Pinpoint, Push Messages, Mails, UI, UE analytics for web apps and ERP

Database

Managed services for Databases for MySQL, Postgre, MS, Oracle, Hana, Sybase, Mongo, Document DB, DynamoDB, Redis, Redshift

Cloud Services

Accelerate your digital transformation journey

Capabilities

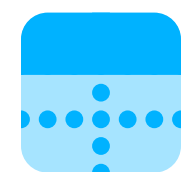

DevOps

Streamline collaboration, automate deployments, and scale effortlessly for ultimate agility and efficiency. Experience faster releases, improved quality, and accelerated innovation with DevOps

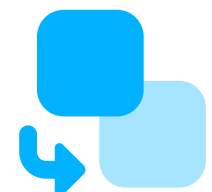

Internet Of Things

IOT device Management, Message Broking, Device Security, Message Queueing

Lift & Shift

Virtual machines on cloud from 2 vCPU to 256 vCPU for memory intensive, compute intensive, AI/ML and graphic use cases. Storage for files, empheral on SSD, SAS, Magnetic Media from 1 GB scalable to PBs

Migration

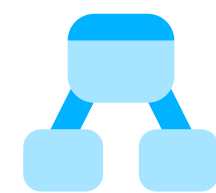

Large Scale Migration of DC, DR, Databases, End to End Assessment, Migration, Modernisation with refactoring and re-platforming

Cloud Services

Accelerate your digital transformation journey

Capabilities

Networking & Content Delivery

Express connect, Direct Connect, Transit Gateway, P2P, CDN, ZTNA/VPN concentrator, MediaLive delivering worldwide connectivity

Cloud Optimisation

Eliminating cloud resource waste by selecting, provisioning, and right-sizing the resources you spend on specific cloud features

Security, Identity & Compliance

IDAM, IDP, AD, LDAP, Cognito for identity management with MFA and PIM/PAM for compliance

Virtual End User Computing

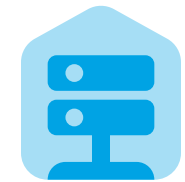

Workspaces, WVD, VDI on cloud for centrally managed workforce

Data Management

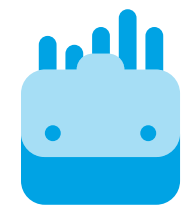

Game-changing capabilities for modern day data solutions

Capabilities

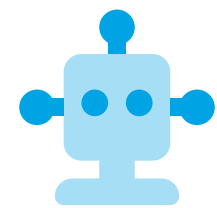

Data Warehousing

Collect, store, and manage large volumes of data from various sources in a centralised repository with a structured architecture for our clients.

Business Analytics

Providing analytics solution to help organizations gain insights from their data, identify trends, and make informed business decisions through Data analysis, Data modeling, Data visualization and Business intelligence

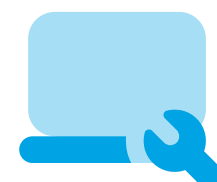

Robotic Process Automation

Improved operational efficiency, reduced costs, and increased productivity by automating business processes via Process identification, analysis, RPA implementation, Process optimization, Process monitoring and maintenance

Application Development

Developing customized software solutions as per the business requirement to improve operational efficiency, reduce costs, and increase productivity

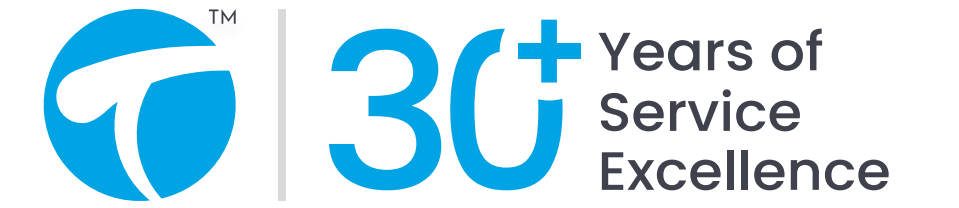

Application Support

Deliver project-based application support services for Java, .NET, Flutter, Power BI, and ThoughtSpot, customised to meet your specific business requirements
