

GOLD FILLED WIRE

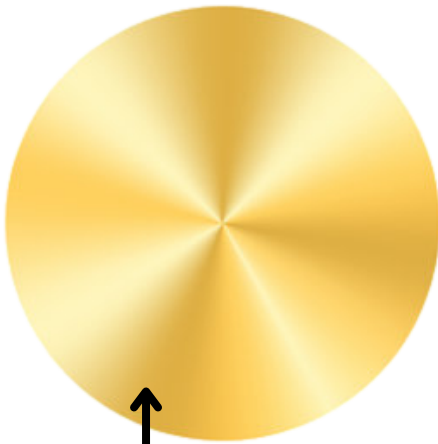

Morvillo Precision Products is delighted to announce the launch of our gold filled wire product line. Our wire is available in both round and shaped formats.

Crafted by bonding a karat gold overlay with a brass core, our gold-filled wire boasts a striking luster akin to solid karat wire, at a fraction of the cost. It's remarkable durability also provides increased product longevity as compared to solid gold. Effortlessly easy to care for, gold filled wire will maintain its radiant shine for a lifetime.

WHY MORVILLO?

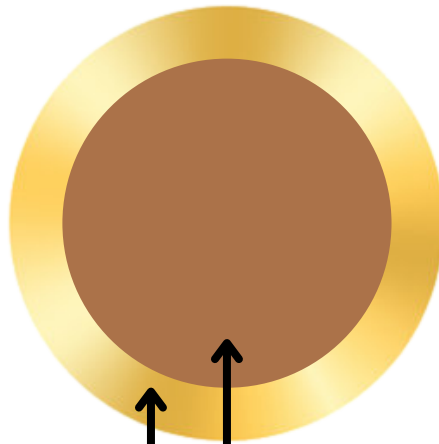

- World Class Product Quality
- Domestic Production
- Engineering & Technical Support
- Effective Product Delivery Programs
