A new lightweight metal zipper, ideal for non-denim pants.

Advantages compared to existing Brass Alloy Zippers

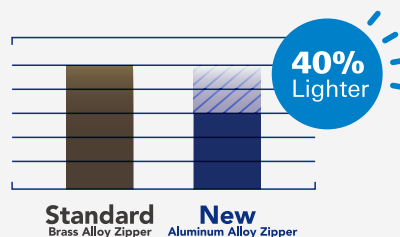

Smoother Operation

New Technology reduces slider operation force (open/close) by approximately 20% compared to conventional No.3 metal zippers for jeans produced by YKK.

* Comparison product: code: YGRC—39 GSBN8
(* YKK actual measurement)

Lightweight

Approximately 40% lighter than conventional No. 3 metal zippers for jeans produced by YKK.

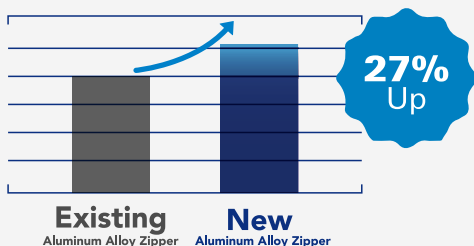

* Comparison product: code: YGRC—39 GSBN8

The next evolution of Aluminum Alloy Zippers

Strength

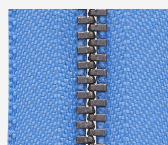

New Technology increases chain crosswise by 27% compared to conventional No.3 aluminum alloy zippers produced by YKK.

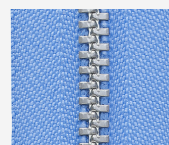

* Compared to the YKK internal strength standards of code: YARNC-39

New Element Color

New aluminum alloy element colors have been created utilizing a new patented technology.

Antique Silver
(code: YAHTH)

(code: YAHN)

Sustainability

Eco-friendly product YZiP® Light NATULON®. The tape of YZiP® Light NATULON® is made of 98% recycled material. YZiP® Light NATULON® finished cut zippers (10 cm) contain more than 20% recycled material by weight.

* Only the tape of YZiP® Light NATULON® is made from recycled materials. All other components are made with virgin materials.

Item Availability

SIZE	CHAIN	ZIPPER END	SLIDER	SLIDER FINISH
03	YAHTH / YAHN	CLOSE-END	DS14GS1 / DA12	H3 / C5

* Please contact YKK sales for the country of production.

* Only the tape of YZiP® Light NATULON® is made from recycled materials. All other components are made with virgin materials.

Care Information

- Aluminum alloy zippers have the advantage of the light weight properties of aluminum, but are susceptible to acid, alkaline, etc.
- Please refrain from any post processing such as stone wash, enzyme wash, acid wash, resin, over-dye, high-intensive bleach, alkali wash or other washing processes that are chemically based.
- YZiP® Light is suitable for machine wash and dry cleaning only.
- Aluminum is a soft metal and tends to be easily scraped by friction. Therefore, aluminum alloy zippers cannot be used with copper alloy sliders such as GA/GS type.
- YKK recommends conducting wash testing before bulk production.
