LB25PL Buckle

LB-PL Size 1"

Technological advances in the safety and sport industries keep YKK continuously developing new products to stay ahead of the competition. Our newest Ultra High Strength buckle, the LB25PL, features our strongest design yet.

Our latest LB25PL buckle boasts a tensile strength of 448lbs, a 12% increase over our previous strength series LB-V. This unique buckle also meets UL Type V (Inflatable & Inherently Buoyant Types) PFD requirements with a smaller length for a better fit to PFD applications. We're confident when you choose a buckle for high-strength conditions, the LB25PL will be the perfect fit.

Features of the LB-PL

1. Compact Shape

Smaller length allows better design fit to PFD.
(71mm is 10% less length from LB25V)

2. Better Holding & Smooth Tape Adjustment

A steep angle allows for a tight lock and smooth tape adjustment with a simple motion.

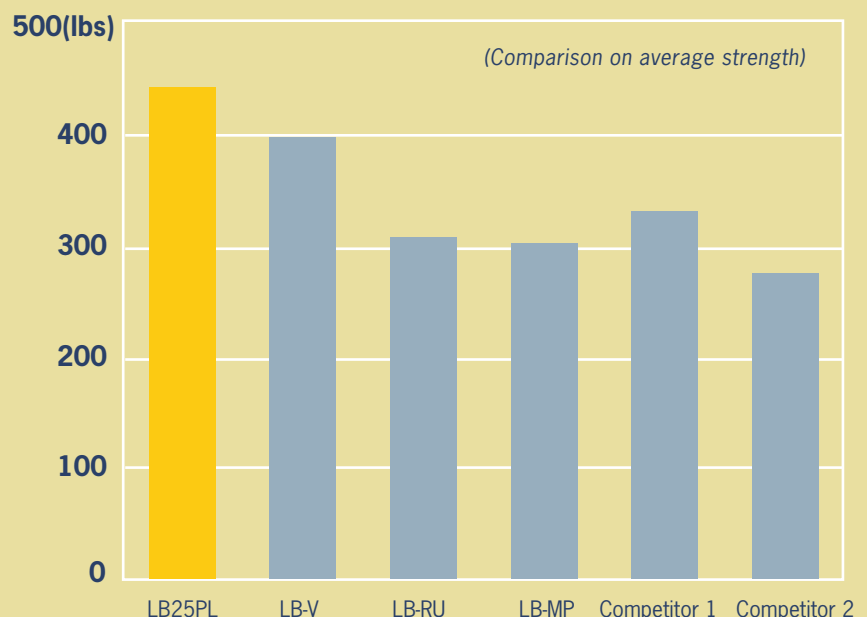

3. Vertical Engagement

YKK's patented "Vertical engagement system" provides higher tensile strength.

4. Wide Opening

Wide opening allows easier release operation.

Tensile Strength^{*2}

* UL Certification Registered

*2 (In accordance to ASTM D76-99)
