Polyacetal (POM) : POM, a crystalline thermoplastic resin, is YKK's main raw material. POM is recommended for high performance applications in a wide range of environmental conditions.

The recommended short-term range of operating temperature is -40C to 130C (-40F to 270F).

Tough-Polyacetal (T-POM) : T-POM is an impact modified polyacetal resin. T-POM maintains excellent tensile strength, stiffness, hardness, dimensional stability, chemical resistance, as well as improved impact strength.
