

Boosting the **biotech** revolution with **software developers**

Within the **life science industry**, software development goes beyond just writing lines of code. It's about crafting elegant and creative solutions rooted in a deeper understanding of the domain. Our engineers are like Poets because they transform abstract ideas into functional, and structured products. They possess a rich blend of **scientific background** and **commercial coding experience**, making them uniquely equipped for this specialized field.

Industries

- Biotechnology
- Drug Discovery
- Pharmaceuticals
- Healthcare
- Life Science Software Tools

Expertise

- Bioinformatics / Cheminformatics
- AI/ML
- LIMS
- Computer Aided Drug Design (CADD)
- Data Management
- Frontend & Backend Development

They trust our Scientific Software Developers

Bridging the gap approach

- **Satisfaction Guarantee** – you don't pay if you are not happy with the service
- **30-day termination period** secures your business flexibility
- **Predictable costs** are warranted as we negotiate our rates only once a year

Dedicated talents

- **Life science specialists** (including PhDs) who provide value from day one
- **Matching your requirements** with a dedicated recruitment process that includes live coding

Profitable solution

- **Pay-per-hour model** ensures you are billed only for the working hours of the developers
- **No additional costs** like recruitment fees, paid time off, insurance, bad hires, and so on

Arrangement & service details

- Time from 1st contact to kick-off: 4 - 12 weeks
- Company based in the EU
- We work with companies in US timezones
- High IP awareness among employees
- Developers are proficient in English
- Service provided remotely
- We keep our cameras on in the meetings 😊
- Hourly rates: \$49 - \$99 per hour
- Billing: monthly, based on timesheets
- Minimum contract length: 3 months
- Effortless contract renewal with a priority on engaging the same team
- One-month termination period
- Negotiable agreements

Think of us as a catalyst for your life science project

– accelerating your software development process and driving results
without altering your project's core essence.
