SEINECA has honored to receive recognition from our customers.  
SEINECA has passed ISO9001 in 2005 and IATF16949 in 2008.

SEINECA, YOUR PART  
SEINECA, YOUR PARTNER

# ZHEJIANG SEINECA AUTOMOTIVE IND.

In 2002, SEINECA Group (abbreviated as "SEINECA") was established in the city of Ruian, located in Zhejiang province, renowned as China's automotive and motorcycle parts capital.

SEINECA AUTOMOTIVE INDUSTRIAL CO.,LTD operates three factories in China with a total area of 70,000 square meters. This includes two in the South with a combined area of 50,000 square meters (40,000 + 10,000) and one in the North spanning 20,000 square meters. The workforce comprises 510 employees, including 170 senior and secondary engineers.

In addition to our state-of-the-art manufacturing facilities, SEINECA takes pride in our commitment to innovation. Our dedicated team of engineers continuously explores new technologies and designs, ensuring that our products remain at the forefront of the automotive and motorcycle parts industry. As we look to the future, SEINECA is actively investing in research and development to bring cutting-edge solutions to our customers.

Our core values of integrity, reliability, and customer satisfaction drive everything we do. We are not just providing products; we are building lasting partnerships. SEINECA's vision for the future includes expanding our product line, exploring new markets, and solidifying our position as a leader in the automotive industry.

We invite potential partners and distributors to join us on this exciting journey. Together, we can achieve new heights of success and innovation in the dynamic world of automotive manufacturing.

# FILTER

**EXCLUSIVE SEINECA PAPER**

Treated, corrugated and Pleated homogeneously.

**Built to meet or exceed  
OE performance**

Product quality is not negotiable; there can't be any compromises in this regard. Besides high-quality materials and excellent processing, this includes optimized alignment of the filter specifications. These specifications influence one another. They must thus be exactly geared to each other in order to ensure outstanding filter performance. All functional and quality tests are performed according to the same standards applied to original equipment parts.

“Our air cleaners are utilized daily in various applications, enduring conditions spanning from low to high dust loads. Modern, high-performance applications, including construction and agricultural machinery, compressors, commercial and special vehicles, as well as engines and gearboxes, must withstand extreme challenges. The use of inferior filters in these applications results in above-average wear. By employing high-quality filters from SEINECA-which are easy to service -you can depend on maximum performance and minimal wear even under the toughest conditions. This is because our products meet the highest requirements and undergo the most rigorous durability tests. With every service, you benefit from a quality standard that aligns with the original equipment manufacturer level.

Research and development are top priorities for us. Our daily work is centered around the wishes and requirements of our customers. In our international R&D and production network, we are constantly expanding our products and areas of expertise. Our air cleaners are robust, high-performance systems designed to meet varied requirements in the fields of production, transport, trades, construction, and agriculture. Here, we offer customers solutions based on modular products as well as individual solutions tailored to specific applications, covering the entire range as a development partner – from the development of media to the provision of comprehensive system expertise."

Precision CNC machining center, put forward higher request for the precision in process, improve the consistency of product precision, so that product standardization has been effectively implemented.

# QUALITY PRODUCTS MADE BY SEINECA

## Reliable Quality, Excellent Performance- It's Not by Accident

The use of a precision CNC machining center imposes higher requirements on the precision in the manufacturing process, enhancing the consistency of product precision and effectively implementing product standardization.

Every staff member at SEINECA adheres to a rigorous working manner, considering quality as vital to customer satisfaction. Embracing a deeply ingrained sense of quality where "0.1% reject means 100% defect," we provide a reliable quality guarantee. Each product undergoes strict and efficient checks, with the results presented alongside the final product to our customers.

SEINECA is an IATF 16949 certified company. Our quality, measurement, and environmental management systems have received international approval, ensuring the harmonious development of the industry, society, and the environment.

We conduct 100% inspection for semi-finished products and finished products to ensure the quality of each item. Through dynamic high and low-temperature tests, thermal shock tests, life tests, and vibration tests, we ensure the safety and reliability of each new product.

# SEINECA

At SEINECA, we understand that the quality and service life of our vehicle's parts are crucial factors influencing its performance. That's why we are dedicated to utilizing innovative production technology and expertise to provide high-quality Electronic & Sensing products. These products are designed to last longer, reducing the need for untimely replacements and ensuring your vehicle remains in optimal working condition.

Keeping abreast of the latest technological developments in the fast-shifting automotive industry, SEINECA specializes in manufacturing and exporting a wide range of over 10,000 SKUs of long-lasting, durable Electronic & Sensing products for commercial and passenger vehicles worldwide.

# WE ARE LOOKING FOR LONG-TERM BUSINESS PARTNERS

SEINECA is establishing a well-developed distribution network with numerous sales centers in 85 countries and regions. Our products, known for excellent quality and service, are highly appreciated by customers for their cost-effectiveness.
