

Notable Steel Building Projects

OUR COMPANY

With an illustrious three-decade history, Dalal Steel Industries has emerged as a global leader in providing durable, affordable, and versatile steel structure buildings and prefabricated houses. Our extensive portfolio spans countless countries, serving a diverse clientele of thousands of satisfied customers. Leveraging our wealth of experience, we are committed to delivering every project with utmost precision and punctuality, ensuring unparalleled customer satisfaction. Trust in our expertise as we continue to shape the future of steel construction, one successful endeavor at a time.

Manufacturer of:

- Steel Buildings
- Prefab Houses
- Cold Storage
- Containers
- Covering Panels
- Sandwich Panels
- Cranes
- Camps
- Shelters
- Steel Stairs
- Steel Doors
- Light Gauge Houses
- Architectural Façades
- Warehouse Solutions and Storage Systems
- Loading Bay Equipment
- Material Handling Equipment

01

Panda Zoo

This project is strategically situated within the vibrant landscape of Qatar.

02

Emiri Naval Base

This project is strategically situated within the vibrant landscape of Qatar.

03

Strongpack

This project is strategically positioned within the dynamic context of Nigeria.

04

Flexipack

This project is strategically positioned within the dynamic context of Nigeria.

05

Dalal's Logistic Center

This project is strategically situated within the dynamic environment of Lebanon.

Panda Zoo Project | Qatar

01

Dalal Steel Industries embarks on a groundbreaking venture in Qatar, constructing a curved and uniquely shaped building that pushes the boundaries of architectural innovation. With meticulous attention to detail, our team embraces the challenge of creating a structure where no two frames resemble each other, ensuring an unparalleled final result. Through our unwavering commitment to excellence, we strive to deliver an extraordinary building that captivates with its distinctive design and surpasses all expectations.

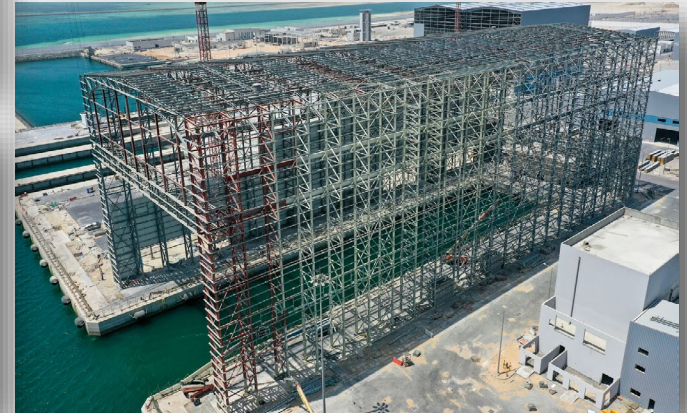

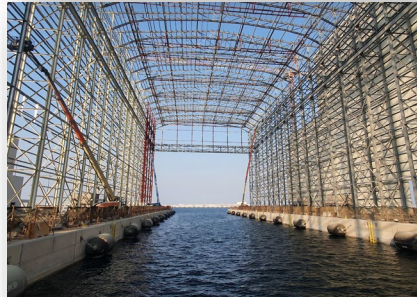

Emiri Naval Base | Qatar

02

We have been commissioned by the Qatar Army to undertake the fabrication and installation of 34 pre-engineered buildings (PEB) for their project. The scope of work involves the utilization of 13,000 metric tons of steel and 155,000 square meters of sandwich panels. Our esteemed client, the Qatar Army, has entrusted us with this significant project, and we are proud to be working in collaboration with the renowned consulting firm, ROSSIAREGG

Strongpack | Nigeria

03

The RC Cola bottling facility is a notable project characterized by a single building covering an expansive area of 84,000 square meters.

This facility serves as a dedicated space for the production and bottling of RC Cola beverages. Its construction and design aim to meet the specific requirements and standards of the bottling industry, ensuring optimal efficiency and productivity.

An aerial photograph of an industrial and residential complex. In the foreground, there are several multi-story residential buildings with light-colored facades and flat roofs, arranged in a cluster. Behind them are two large, long industrial buildings with white and grey corrugated metal roofs. The surrounding area is mostly bare, reddish-brown earth, with some construction materials and vehicles visible. A dirt road runs along the bottom of the complex. The background shows a dense green forest.

Flexipack | Nigeria

04

Dalal Steel Industries is undertaking a significant project involving the construction of a single building film (BOPP) manufacturing plant. This plant spans an extensive area of 88,000 square meters.

The manufacturing plant will be designed and constructed with precision and expertise by Dalal Steel Industries. The primary focus of this project is to establish a state-of-the-art facility dedicated to the production of single building film using Biaxially Oriented Polypropylene (BOPP) technology.

Dalal's Logistic Center | Lebanon

05

The logistic center encompasses four fully insulated warehouses, with each warehouse boasting an impressive area of 8,000 square meters and a remarkable clear span of 40 meters.
