## Early investor round 1

The mini collection of 111 NFTs that have the highest potential to become a real collectible with a rapid increase in value after a break-through in success of Nova-Dox. Besides that this collection offers a 90% share in profit after the earn-back period. In other words; Nova-Dox won't earn anything on the investors in this round, who help to kickstart Nova-Dox. The token holders are maximum rewarded.

## Characteristics

100% of funds are used for marketing to kickstart Nova-Dox.

Nova-Dox uses 100% of profit to pay back the token holders.

Once earned back, the funds are deposited in the trading pool behind this collection and the buy-back guarantee is activated.

The software will be activated and token holders will get a 90% share in profit (other 10% to dog paradises).

Highest potential for 2-100x on NFT.
